Notes

1. SUNON will not guarantee the products if the application of our products is exceeded the limitation which is specified on this specification.

2. In case of change of the specification specified on this document, a written notice is requested in advance.

3. Please do not touch the impeller with pressure and never bring the fan with lead wire. The bearings and lead wire may be damaged.

4. No guarantee on the products against the safety problem or failure caused by powder dust, drop of water or insect.

5. If there is any data or related documentation different from this data sheet, this data sheet is the principal reference.

6. For the purpose of MIS, please indicate SPEC No. on every order.

7. In case of the fan has no polarity protection function, wires with same color (electrode) must be connected together during the assembly. (i.e. red + red, black + black) or the fan will be damaged immediately.

8. Please do not use the fan in the environment of corrosive gas or liquid or any detrimental gas.

9. Please do not store the fan in the environment of high / low temperature, high humidity or any detrimental gas. Please store the fan within 6 months, every 6 months, there shall be a linkage of electric current to the fan, even though the fan is stored in room temperature.

10. While the fan is in operation, please do not lock the fan intentionally for a long period of time, since the continuous stoppage will result in over-heat and damage of the fan.

11. During the installation of the fan, please pay substantial attention to possible noise cause by resonance vibration and vibration.

12. During the testing of the fan, please be sure to use finger guard to insure safety.

13. Unless otherwise specified, if there is any doubt in the judgement, the temperature and relative humidity range of environment will be take in according to the standard test condition as 25℃ and 65%.
