

Offset Long Blade Journeyman Snip

Klein Tools' Offset Snips are used to cut 20 gauge cold rolled steel and 24 gauge stainless steel. The blades are offset to move material away from the blades allowing the snip to move forward unobstructed. Soft touch aviation grips provide maximum control and comfort. The exclusive Klein-Kurve® handle provides a more natural hand positioning. The blades are made of long-lasting serrated forged steel for superior strength and durability. Tip-Ident® on the handles and color-coding allow for easy identification of the cutting pattern.

Specifications
