

Dual Range High Voltage Tester

The Dual-Range Non-Contact Tester checks for the presence of voltage in overhead conductors or finds faults in cables. The LOW range detects 50V AC to 1.5kV AC. The HIGH range detects 1.5kV AC to 132kV AC. The tester indicates the presence of voltage with both audible and visual signals.

Specifications

Type:	Dual-Range	Application:	Check for the Presence of Voltage in Overhead Conductors or Finds Faults in Cables
Special Features:	Indicates The Presence of Voltage With Both Audible and Visual Signals	Overall Length:	13" (33 cm)
Voltage:	Low: 50V AC - 1.5kV AC High: 1.5kV AC - 132kV AC	Included:	Carrying Case, (1) 9V Battery
Weight:	10.6 oz (299 g)
