

Product change notification (PCN)

Title / short description	Change to the interior plastic housing shape of the CC(V) 2,5/...-G families
Affected article category	PCB terminal blocks and PCB connectors
Change category	Form and appearance
Change number	AAA160112-01

Purpose/objective of the change

In order to maintain the ability to deliver, production will switch back to the previous plastic tools for a brief period.

Detailed description of the change

In PCN AAA160112 Revision 00 (see appendix), a change to the interior shape of the housing was announced as part of the continuous improvement process. The items in "Material_list.csv" have already been changed over to the new tools with the new shape. To increase process capability, the new tools will have to be reworked. In order to maintain the ability to deliver, production will revert to producing all CC(V) items for a transitional period using the previous tools with the old shape. Once the tools have been optimized, the changeover to the new shape will take place. The batch number will be revised at each transitional step. The technical data and external dimensions will not change.

Identifying characteristics

Start of Production (SOP)	-	Last Time Delivery (LTD)	-	
Effective date (EOP)	2020-03-01	End of Service (EOSR)	-	
End of Sales (EOS)	-			

Short-term change (< 6 months) or discontinuation (< 12 months), due to:
