### DATASHEET - NZMB2-A300

Circuit-breaker, 3p, 300A

Part no. NZMB2-A300 Catalog No. 107518

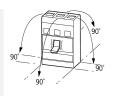

Similar to illustration

### Design verification as per IEC/EN 61439

| Technical data for design verification                                                                                 |                  |    |                                            |
|------------------------------------------------------------------------------------------------------------------------|------------------|----|--------------------------------------------|
| Rated operational current for specified heat dissipation                                                               | I <sub>n</sub>   | А  | 300                                        |
| Equipment heat dissipation, current-dependent                                                                          | P <sub>vid</sub> | W  | 83.7                                       |
| Operating ambient temperature min.                                                                                     |                  | °C | -25                                        |
| Operating ambient temperature max.                                                                                     |                  | °C | 70                                         |
| IEC/EN 61439 design verification                                                                                       |                  |    |                                            |
| 10.2 Strength of materials and parts                                                                                   |                  |    |                                            |
| 10.2.2 Corrosion resistance                                                                                            |                  |    | Meets the product standard's requirements. |
| 10.2.3.1 Verification of thermal stability of enclosures                                                               |                  |    | Meets the product standard's requirements. |
| 10.2.3.2 Verification of resistance of insulating materials to normal heat                                             |                  |    | Meets the product standard's requirements. |
| 10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects |                  |    | Meets the product standard's requirements. |

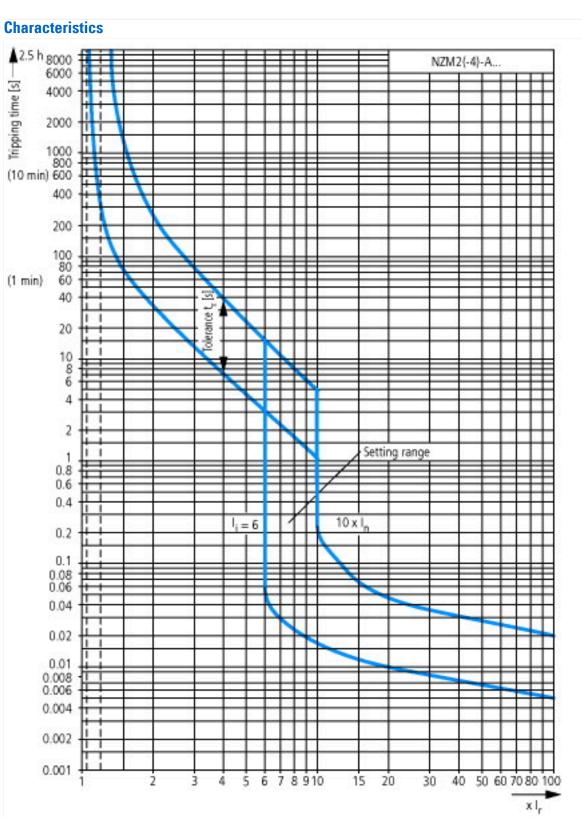

| 10.2.4 Resistance to ultra-violet (UV) radiation         | Meets the product standard's requirements.                                                                                       |
|----------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------|
| 10.2.5 Lifting                                           | Does not apply, since the entire switchgear needs to be evaluated.                                                               |
| 10.2.6 Mechanical impact                                 | Does not apply, since the entire switchgear needs to be evaluated.                                                               |
| 10.2.7 Inscriptions                                      | Meets the product standard's requirements.                                                                                       |
| 10.3 Degree of protection of ASSEMBLIES                  | Does not apply, since the entire switchgear needs to be evaluated.                                                               |
| 10.4 Clearances and creepage distances                   | Meets the product standard's requirements.                                                                                       |
| 10.5 Protection against electric shock                   | Does not apply, since the entire switchgear needs to be evaluated.                                                               |
| 10.6 Incorporation of switching devices and components   | Does not apply, since the entire switchgear needs to be evaluated.                                                               |
| 10.7 Internal electrical circuits and connections        | Is the panel builder's responsibility.                                                                                           |
| 10.8 Connections for external conductors                 | Is the panel builder's responsibility.                                                                                           |
| 10.9 Insulation properties                               |                                                                                                                                  |
| 10.9.2 Power-frequency electric strength                 | Is the panel builder's responsibility.                                                                                           |
| 10.9.3 Impulse withstand voltage                         | Is the panel builder's responsibility.                                                                                           |
| 10.9.4 Testing of enclosures made of insulating material | Is the panel builder's responsibility.                                                                                           |
| 10.10 Temperature rise                                   | The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices. |
| 10.11 Short-circuit rating                               | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.12 Electromagnetic compatibility                      | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.13 Mechanical function                                | The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.                         |
