

## Hands off this high-touch area

### Plug Valve / Drinking Fountain Lockout

As you welcome back employees, students or other visitors to your facilities, keeping everyone protected means high-touch areas are becoming new hot zones requiring attention. With proper identification that provides directions, you can reduce some risks. But sometimes identification can be overlooked. **With this innovative device you can cover the spout of most drinking fountains to prevent use, and keep hands off a high-touch area.** With this device you can also:

- Keep the water flowing on bottle-filling stations connected to the fountain so people can stay hydrated
- Lock out standard plug valves with a stem diameter ranging from 1-1/2 in. to 2-1/8 in. when pandemic concerns are over

Catalog No.	Description	Quantity
113233	Plug Valve / Drinking Fountain Lockout	1

#### The winning highlights

**How you win:** Get a visual indicator and a physical barrier in one product

**Where you win:** Anywhere drinking fountains are available

**The added bonus:** Lock out plug valves after pandemic concerns are over
