Information about product discontinuation

Dear Ladies and Gentleman,

With this letter, we inform you that we have to discontinue the delivery of some parts due to material availability and/or increasing MOQ's from our current supplier. For low volume parts, we will unfortunately not be able to offer an alternative. For other parts, we can offer an alternative from a different, for Lumberg well known, supplier.

As the alternative is not 1:1 we ask you to verify attached specification to check if it fits in your application. In case of remaining demand, please contact us, as we cannot offer a classic last time buy option.

The discontinuation is valid with immediate effect for new orders. Unfortunately, the supply chain is already affected for some parts, so that we have to cancel orders, which were already confirmed. We have received this information on short-term notice so that we cannot offer you an optimized discontinuation scenario. Please apologize any inconvenience caused.

In the attachment, you can find a detailed overview of all parts as well as well the detailed impact for your company.

Please forward this information to the person in charge.

In case of any questions, do not hesitate to contact us.

Thank you for your understanding.

With Best Regards

Lumberg Connect GmbH
Rahel Krämer
