

CND-HBTK7

Wireless Rechargeable Dual-Mode Keyboard

This wireless keyboard is a universal remote control for your home and office! Forget about switching between multiple cables and receivers, the keyboard keeps stable with 4 devices at the same time. 3 Bluetooth channels and 1 wireless USB channel allow to quickly switch between devices on 10-meter distance. The keyboard is compatible with all modern PC's, tablets, smartphones and Smart TV, Apple TV. The keys are soft and quiet, the touchpad supports gesture control. Despite its thin size, it has a rechargeable battery, capable of working over 4 days on a single charge. A great addition to all its features is a smartphone/tablet stand, located on its front panel.
