New: molded HARTING Logo

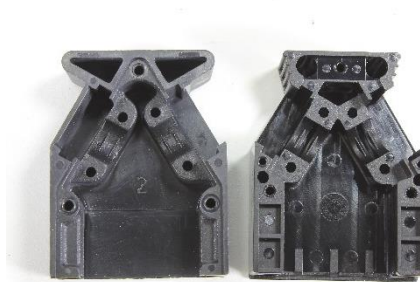

(Image shows the 9-pole plastic hood and is for illustration purpose only)

- Different inner shape for optimized molding

Old:

New:

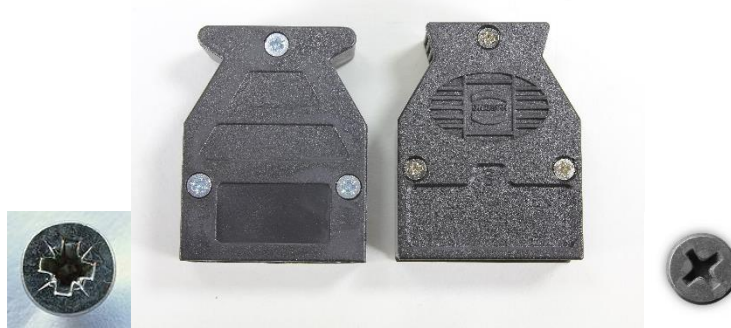

(Image shows the 9-pole plastic hood and is for illustration purpose only)

- Kind of screw head:

Old: Cover screws with Pozidriv head (tool PV1) packed in the set

New: Cover screws with Phillips head (tool PH0) packed in the set

3. Impact on product specification:

The functional characteristics will remain unchanged and the new generation will be backward compatible with the today's versions.

4. Scheduled date of implementation:

The automatic switch starts in February 2019, however the product delivery switch will be done step by step once the stock of goods from the former version is empty. For a short time period it is possible that we will deliver a mix of old and new parts within one delivery, this cannot be avoided completely. There is no possibility to switch back to the old status after the stock is sold out.

5. Identification of change:

Part numbers remain the same, only the revision level will be increased.

6. Data sheet (optional):

- Data sheet,
 - updated TBs,
 - updated material data and
 - updated 3D models
- will be available in our e-business at the scheduled time.
