

Description

The Chemical Pillows are yellow in colour and are made from a spun bond outer layer for fast wicking, with a treated hydrophilic absorbent and are stitched around the outside to avoid any chemical reactions. Where liquids need to be contained and absorbed, the best choice is one or more of absorbent socks. This offers a barrier to stop any spills spreading.

Pillows are used to catch spills under machinery or where drops and leaks are a problem. They are also ideal for absorbing spills in difficult to access places or where pooling of a spill has occurred.

Part Number Table

Description	Qty. in Pack	Absorbency	Part Number
Chemical Pillow, 38cm x 23cm	16	3.7L Per Pillow	MP005308
