pi-top

Bluetooth **Keyboard.**

A full-size wireless keyboard that protects your pi-top FHD Touch Display.

36 hours
Bluetooth

Sleek & compact design

The pi-top Bluetooth Keyboard combines a sleek design with a built-in rechargeable battery and trackpad. Connect it to your Raspberry Pi, pi-top [4] or computer.

A keyboard that has you covered

The pi-top Bluetooth Keyboard works as a durable screen protector for your pi-top FHD Touch Display. It magnetically attaches to the base of the pi-top FHD Touch Display — no need for switches, plugs and pairing.

Compatible with a wide array of devices

Auto-pair it with your pi-top [4] or simply connect it to your Raspberry Pi or computer via Bluetooth.

Great typing experience anywhere

Its rechargeable battery offers 36 hours of power before you'll need to recharge it.
