

Antistatic Service Box/Case

Antistatic Service Box

- Manufactured from conductive carbonised polypropylene
 - Designed for the storage and transporting of static sensitive components
 - The case has 15 fixed compartments of varying sizes
 - Robust and durable with three hinges for strength and two sliding catches to lock the lid securely in place
- PSB4-15 ESD 340 x 260 x 57mm

Antistatic Service Case

- Manufactured from conductive carbonised polypropylene
- Designed as a flexible storage and transport system for static sensitive components
- The case comes as an empty unit for use with the ESD inserts
- This allows flexibility to the layout, and inserts along with contents can be transferred directly from the service case to either the ESD toolboxes or ESD cabinets
- Robust, durable design with three hinges, two sliding catches and carrying handle
