

ID Mouse

Upgrade access security to a computer with the installation and use of the ID mouse. This ID Mouse is the first product to use the FingerTIP? biometric sensor from Siemens providing reliable identification at a reduced cost.

The FingerTIP? sensor uses capacitive rather than optical recognition

More than one user can be scanned

Fingerprint data is access protected and not stored in plain text

3 button scroll mouse (non-optical)

For left or right handed use

USB 1.x connection

Supplied with access control software

Supports Win 98/2000/ME

Contents: Mouse, guides and software
