Product Name: LattePanda Starter Kit (with European-Standard Power Adapter)

Introduction

Does the LattePanda shut down automatically when you run a software?
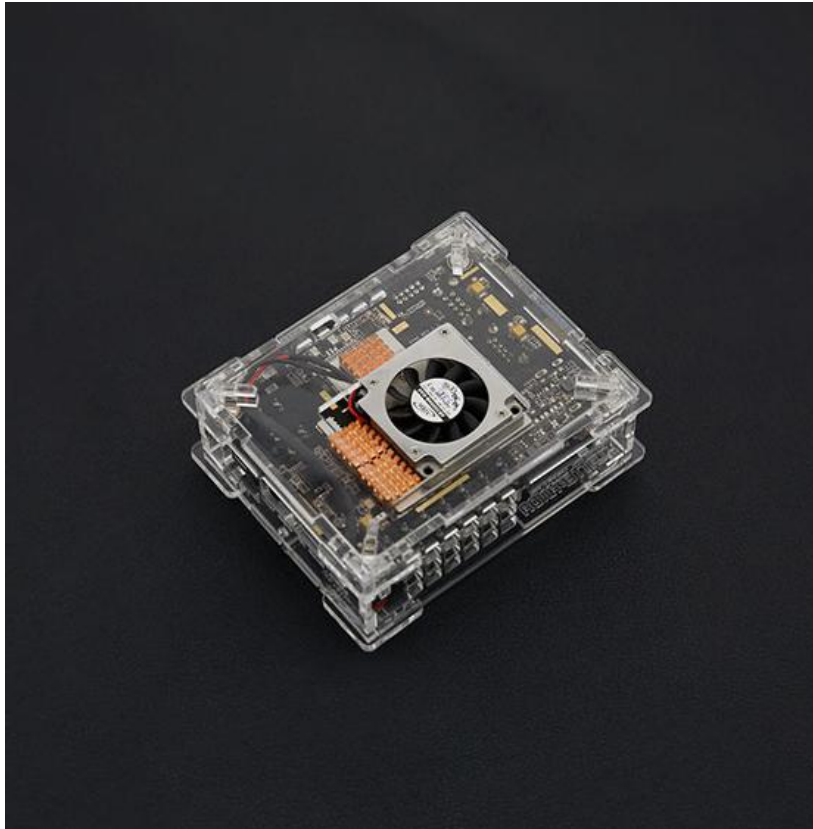

Is it running hot and throttling?

I like my LattePanda, but why things are not going well.

I think you just need a little help at the beginning. So, DFRobot grandly launch this starter kit.

The LattePanda starter kit includes everything you need to get going right out of the box!

【Components List】

【Assemble Diagram】

This starter kit provides you with

- Power supply: the high-quality supply to power up your LattePanda with a stable 5V power that won't vary or sag.
- USB cable: super antioxidant properties for stable performance and durability.
- Cooling fan: low noise and has a thermal pad on the back that can stick on the metal shield on the board. Easy to use with 2-Pin jumper wire. A simple and effective way to make the LattePanda cool!
- Heatsinks: cover all heat sources, help cooling the LattePanda
- Enclosure: a nice and solid clear enclosure for LattePanda, keep the dust out and prevent short circuit.
- HDMI cable: It has nice molded grips for easy installation, and is 1 meter long (about 3 feet).
