

Solder Dispenser for 500g Solder Reels  
Farnell 419-606  
SD1000

Keeps the working area tidy and reduces solder wastage. The solder wire is led from the solder dispenser through a guiding tube. The SD1000 can be positioned for the soldering job in such a way that the hands of the operator are free for the soldering iron and the component to be soldered.

- **Wire is fed through a dispensing tube**
- **Friction mount prevents reel running on**
- **Suitable for all gauges of 500g reels**
