**Application notes**

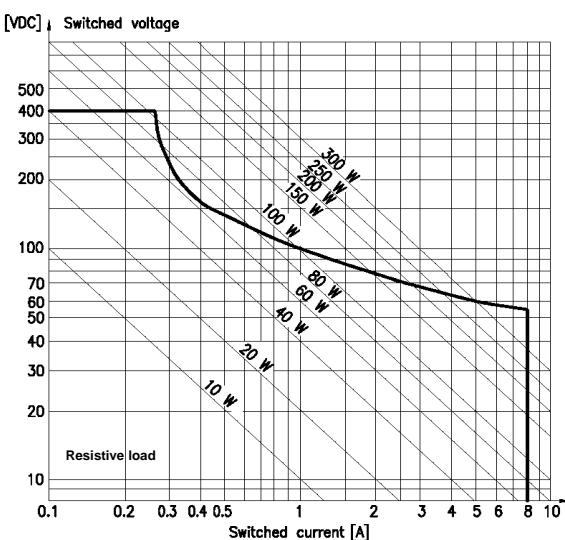

If required a breathing hole can be made in the cover by removing the nipple. However be aware that the degree of protection will reduce from IP67 to IP30!

**Relay characteristics are influenced by**

- strong external magnetic fields
- magnetic conductive materials near the relay
- narrow top-to-top mounting (printed surface to printed surface)

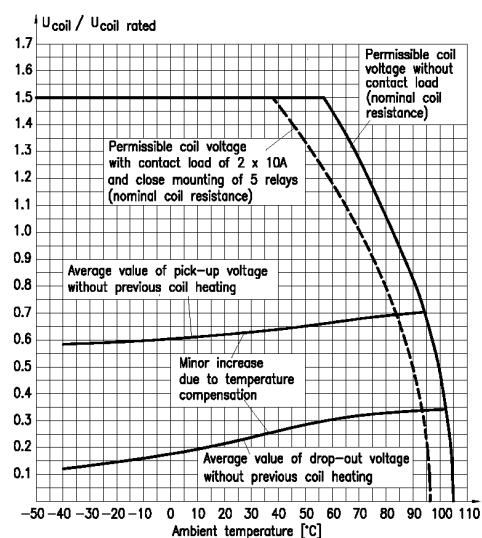

Note: Suitable for most common washing methods except ultrasonic cleaning.

## Load limit curve

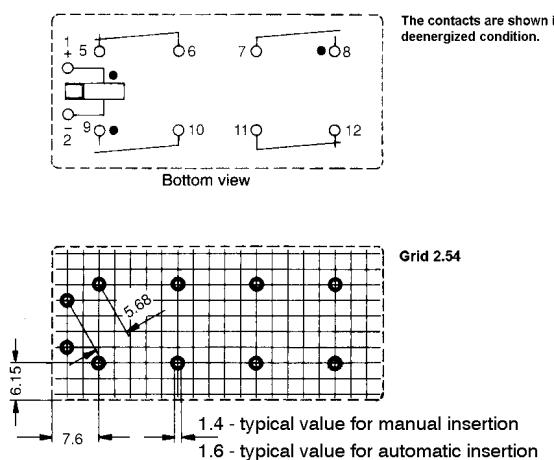

Loads in the range under the curve can be switched safely.  
The arc will extinguish before the opposite contact makes.
