

# AC/DC 15W Enclosed Switching Power Supply

TGR15-XX, TGR15-XX-C, TGR15-XX-Q Series

## FEATURES

- 85 - 305VAC or 100 - 430VDC input voltage
- Accepts AC or DC input (dual-use of same terminal)
- Operating ambient temperature range: -30 °C to +70 °C
- Up to 83% efficiency
- No-load power consumption < 0.5W
- High I/O isolation test voltage up to 4000VAC
- Output short circuit, over-current, over-voltage protection
- IEC/EN/UL62368, GB4943 safety approval
- Over-voltage class III (designed to meet EN61558)
- Operating up to 5000m altitude

TGR15-XX series is one of Tiger Power's enclosed AC-DC switching power supply. It features universal AC input and at the same time accepts DC input voltage, cost-effective, low no load power consumption, high efficiency and high reliability. These converters offer excellent EMC performance and meet IEC/EN61000-4, CISPR32/EN55032, IEC/UL/EN62368, GB4943 standards and they are widely used in areas of industrial, LED, street light control, electricity, security, telecommunications, smart home etc.

## Selection Guide

| Certification   | Part No.* | Output Power (W) | Nominal Output Voltage and Current(Vo/Io) | Output Voltage Adjustable Range(V) | Efficiency at 230VAC (%) Typ. | Capacitive Load (μF) Max. |
|-----------------|-----------|------------------|---|------------------------------------|-------------------------------|---------------------------|
| UL, CE, CB, CCC | TGR15-3   | 9.9              | 3.3V/3.0A                                 | 2.85-3.6                           | 73                            | 3000                      |
|                 | TGR15-5   | 15               | 5V/3.0A                                   | 4.5-5.5                            | 78                            | 2400                      |
|                 | TGR15-12  | 15.6             | 12V/1.3A                                  | 10.2-13.8                          | 82                            | 1800                      |
|                 | TGR15-15  | 15               | 15V/1.0A                                  | 13.5-18                            | 82                            | 1200                      |
|                 | TGR15-24  | 15               | 24V/0.625A                                | 21.6-28.8                          | 83                            | 600                       |
|                 | TGR15-48  | 15.36            | 48V/0.32A                                 | 42-54                              | 83                            | 300                       |

Note: \*Use suffix "C" for terminal with protective cover and suffix "Q" for conformal coating.

## Input Specifications

| Item                | Operating Conditions | Min.        | Typ. | Max. | Unit |
|---------------------|----------------------|-------------|------|------|------|
| Input Voltage Range | AC input             | 85          | --   | 305  | VAC  |
|                     | DC input             | 100         | --   | 430  | VDC  |
| Input Frequency     |                      | 47          | --   | 63   | Hz   |
| Input Current       | 115VAC               | --          | --   | 0.35 | A    |
|                     | 230VAC               | --          | --   | 0.25 |      |

- Note:
- For additional information on Product Packaging please refer to [www.TigerPowerSupplies.com](http://www.TigerPowerSupplies.com)
  - Unless otherwise specified, parameters in this datasheet were measured under the conditions of  $T_a=25^\circ\text{C}$ , humidity<75%RH with nominal input voltage and rated output load;
  - The ambient temperature derating of  $5^\circ\text{C}/1000\text{m}$  is needed for operating altitude greater than 2000m;
  - All index testing methods in this datasheet are based on our company corporate standards;
  - In order to improve the efficiency at high input voltage, there will be audible noise generated, but it does not affect product performance and reliability;
  - We can provide product customization service, please contact our technicians directly for specific information;
  - Products are related to laws and regulations: see "Features" and "EMC";
  - The out case needs to be connected to the earth of system when the terminal equipment in operating;
  - Our products shall be classified according to ISO14001 and related environmental laws and regulations, and shall be handled by qualified units.
  - The power supply is considered a component which will be installed into a final equipment. All EMC tests should be confirmed with the final equipment. Please consult our FAE for EMC test operation instructions.
