Help with choosing the right products

Every area a cable management product is used requires an element of health and safety consideration to protect against loss, damage or increased risk of fatalities. To help you make the right choices depending on the installation, HellermannTyton has developed a simple graphical key. Look out for these icons throughout this section.

Electrical Installation Tools and Accessories

As well as HellermannTyton supplying core products to the electrical industry, we also have available a range of indispensable products and accessories used from day to day in electrical distribution.
The Award Winning Cable Rod system – voted ‘The Best Product of the Last Fifty years’ by professional trades people and engineers that have used the range. Installations are faster, cleaner, neater and frequency use less materials – a winning combination for improved service, profits and professionalism. 100% testing is carried out on all rods.

The real innovation behind the Cable Rod system is that it doesn’t just route cable, it’s a multi-purpose tool that will also allow inspection, illumination and retrieval with the many ingenious and time saving attachments available.

The Cable Rod system has helped to save over 16 million hours to the electrical industry to date.

By using the Cable Rod range you can expect to:

- Cut cable installation time by up to 60%
- Increase safety – reduce ladder work
- Minimise disruption to the work site
- Solve installation associated problems
- Route and conceal cable easily

Insight into the elements that make up a Cable Rod.

Using the right rod for the job is essential for rapid and easy installations and a key factor is choice of flexibility.

Our principle rods are made in three flexes because a rod that will go around pronounced bends won’t be rigid enough to span a large void or to push through obstructed routes.

To improve handling and life expectancy, and to remove splinter and irritation problems our Principle Rods are made from unique, wear-resistant Adoxim®. It’s inherent good natured qualities mean we avoid the bulky coatings used to cover up low grade rods.

Adoxim®

Adoxim® is a special formula developed by Super Rod specifically for professional trade use. As well as vastly improving handling, Adoxim® has both extra stiffness AND extra flexibility.

In practice that means you can push a ‘rod-train’ further without it snaking AND you can bend it more without it breaking.

Strong metal end fittings have a simple friction lock action to keep rods more securely joined, and a smooth shaped finish that reduces snagging.

These fittings, our bonding methods and new Adoxim® mean Cable Rods are now even better.

Cable Rod means Quality.

100% testing on all rods is religiously performed.

From goods in checks of raw materials to sourcing the best quality products possible, the Cable Rod system will deliver to you the optimum in quality that can be achieved in a cable routing system. Speciality bespoke machinery is used to perform scientific and exact testing on all components that make up the Cable Rod system.
Cable Rod Sets

Mega Set - CRMX
The Mega Set is without a doubt the most comprehensive cable routing kit available on the market. 16 metres of overall rod length including all flexibilities and essential items from the Super-Flex and specialised rod ranges means very few places are inaccessible. The Mega Set enables examination, planning, preparation and installation of the fastest and most economical route - requiring less drilling, fixing and making good.

LENGTH: 16 Metres
APPLICATION: Route - Retrieve - Illuminate - 5 Flexibilities - Grip
The speciality range of rod pairs each have unique capabilities to overcome specific routing problems encountered in day to day installations.

**Rod Pairs**

Using the right rod for the job is essential for rapid and easy installations and a key factor is choice of flexibility. The various choices of rod pairs allow you freedom to extend the functionality of your Cable Rod system.

**Speciality Rod Pairs**

- **Floppy Rod Pair**
  - Description: The 4mm Bendi-Rod really comes into its own when you are working in a restricted space such as in corners and close to floors and ceilings. The greater flexibility allows a high degree of bending without fear of snapping, yet the rod retains sufficient stiffness for pushing cable into place.
  - Reference: CRFF
  - Price: £10.45

- **Standard Rod Pair**
  - Description: The universal 5mm rod is a very happy compromise between flexibility and stiffness. It has enough flex to cope with smooth sweeping bends, is rigid enough to span open areas and is strong enough to push through many obstructions. The universal rod is the staple rod in all our Cable Rod sets.
  - Reference: CRST
  - Price: £10.45

- **Stiffy Rod Pair**
  - Description: The tough 6mm Stiffy Rod swaps flexibility for rigidity and strength. Good for bullying its way through insulation, debris and blocked conduit. Long open runs can be easily conquered because of the Stiffy Rod's extra directional control.
  - Reference: CRST
  - Price: £10.45

- **Nylon Rod Pair**
  - Description: The 1000mm rod is so flexible you can tie it in knots — but it is made from a ‘no memory’ material so will straighten without bends or kinks. Use on its own or with a short ‘rod train’ to reach really awkward places or to weave a way through multiple obstructions.
  - Reference: CRNR
  - Price: £13.45

**Speciality Rod Pairs**

- **Swivel End Glo Rod**
  - Description: Working in dark voids and keeping sight of your rod end can be difficult. The half metre Fluorescent Glo-Rod is the simple but very effective solution and as a bonus comes complete with a Swivel End.
  - Reference: GLSE
  - Price: £8.35

- **Swivel End Glo Rod Repair**
  - Description: The Swivel End Glo Rod solves the hassle and frustration when cable or flexible conduit keeps twisting as it tries to recoil — tying itself in knots, twisting out of your hand or trying to unscrew the rods.
  - Reference: SWRP-S/4
  - Price: £15.70

- **Mixed Rod Repair**
  - Description: This rod pair comprises of a standard 5mm standard red rod and 5mm fluorescent Glo rod.
  - Reference: MXRP
  - Price: £12.10

**Super Grips**

This attachment provides a quick solution by gripping objects from outside and tightening the grip under tension, they provide a very reliable and superb fast method for securing pipes and cables to rods. The Super Grip is available in a wide range of sizes and multi-packs which cater for most cable sizes.

Loading of grips? Explanation of size reference is ‘the different Super Grips are identified by colour and by title. The title, for example 4mm - 6mm refers to the diameter of cable it will fit, not the area as with cable measurement.

**Glider / Glider X2**

The Glider will skip over all sorts of obstacles and is particularly successful for routing cable over ceiling insulation and joists. The Glider has been cleverly designed to take other attachments for super efficiency, the Super Grips and Super Beam Torch Attachment can both be used with the Glider maximising on the functionality this item permits. The Glider X2 enables cable to be routed through rougher terrains. Works especially well at height, this Glider will skip effortlessly over an Apex Roof. Made from Nylon for extra bounce!

**Super Beam**

Inspect cable routes, track and guide rods to target, identify distant objects, cable markers and obstructions. This powerful white LED torch automatically lights up when you screw it onto a rod.

**Super Beam Replacement Battery**

A handy replacement battery set to complement the ‘Super Beam’ torch attachment.

## Cable Rod Attachments

<table>
<thead>
<tr>
<th>Product</th>
<th>Description</th>
<th>Reference</th>
<th>Price</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Attachment Tube</strong></td>
<td>A comprehensive set of attachments allowing you to extend the functionality of the Cable Rod system. Comprises of: 1 x Thread Cleaning Flat Bullet – attachment acts as a snow plough helping you to push rods through gritty dirty places without jamming. 1 x Single Magnet – a neat and strong magnet capable of lifting over 1kg. 1 x Chain – incredibly useful when used with the magnet for fishing in unsighted areas or when you have to access small areas. 1 x Mini Eye and Ring – simply twist a cable or cable-bundle onto the ring for a secure method of pushing or pulling them into place. 1 x Gender Changer – most attachments are male threaded – so when you’ve accidentally fed the male end of the rod, just use the gender changer to join male to male. 1 x Mini Hook – useful for lightweight cabling and when access is restricted. 1 x Flexi Lead – this short leader helps a single rod or rod train around tight corners.</td>
<td>CRAT</td>
<td>£10.45</td>
</tr>
<tr>
<td><strong>Chain and Magnet</strong></td>
<td>A fantastically useful attachment set. A life-saver when you are working unsighted or only have a small access hole, the chain literally jumps onto the magnet. Perfect for making the link between lost or obscured rod ends and access holes.</td>
<td>CRCM</td>
<td>£6.50</td>
</tr>
<tr>
<td><strong>Mixed Pack of 5</strong></td>
<td>Contains the following attachments: 1 x Tuff Hook 1 x Thread Cleaning Flat Bullet 1 x Gender Changer 1 x Domed Bullet 1 x Mini Eye and Ring</td>
<td>CRMP5</td>
<td>£7.95</td>
</tr>
<tr>
<td><strong>Mixed Pack of 7</strong></td>
<td>Contains the following attachments: 1 x Tuff Hook 1 x Mini Hook 1 x Single Magnet 1 x Flat Bullet 1 x Domed Bullet 1 x Mini Eye and Ring 1 x Thread Cleaning Flat Bullet</td>
<td>CRMP7</td>
<td>£8.95</td>
</tr>
<tr>
<td><strong>Mag Com</strong></td>
<td>For effortless rod end location and tracing. The MagCom is ideal when working blind in studwalls or over solid ceilings. Minimises effort and damage to the working environment. The Mag-Com Tracer is accurate to approximately 60mm depending on the material it has to sense through.</td>
<td>CRMC</td>
<td>£14.25</td>
</tr>
<tr>
<td><strong>Head Torch</strong></td>
<td>Not an attachment, but essential for hands free working in poor light. The Head Torch is lightweight, compact, comfortable and has 5 ultra-bright LED bulbs. Four settings – low power, full power, flashing and off. 3 AAA included.</td>
<td>SRHT</td>
<td>£14.25</td>
</tr>
<tr>
<td><strong>Flexi Lead Kit</strong></td>
<td>These little devices can also be tied into a knot – but they do keep their shape so you can pre-bend them (again and again) to get an end attachment into really fiddly places or when two holes do not line up. Also includes a 350mm Flexi Lead and Domed Bullet.</td>
<td>CRFKL</td>
<td>£10.50</td>
</tr>
<tr>
<td><strong>Double Magnet</strong></td>
<td>This magnet is so strong it will allow you to pick up a 2.5kg lump hammer. The Double Magnet is not only great at retrieving lost tools and keys, it can also be used to ‘pick up’ the steel Tuff Hook on the end of another rod and pull it across a void.</td>
<td>CRMG2</td>
<td>£6.25</td>
</tr>
<tr>
<td><strong>The Claw</strong></td>
<td>A double headed attachment which uses the specialised ‘shape-it’ material HD15® of slightly varying lengths, enabling you to perform two tasks at once. Suggested attachments to place on the end of The Claw are the Tuff Hook and the Super Beam – illuminate and retrieve all at once.</td>
<td>SRCLAU</td>
<td>£7.95</td>
</tr>
<tr>
<td><strong>Brush Pair</strong></td>
<td>Clear away debris and blockages in conduit, drain pipes and even flues. Brush sizes: 1 x 25mm diameter 0.35 filament 1 x 50mm diameter 0.90 filament</td>
<td>CRBR25-50</td>
<td>£8.95</td>
</tr>
</tbody>
</table>
Why coiled based products?

Rod and coiled based products are not competitors; they complement each other perfectly and should be regarded as equals; each type a master in its own environment but out of place in the other. More and more premises, especially commercial builds, feature cable runs housed in conduit; and involve short radius which are too abrupt for normal rod based systems. The key to successful cabling in conduit is to use a long, thin, highly flexible ‘rod’ without connectors.

Considerations when choosing coiled products

When routing inside conduit you need flexibility – lots of it, yet at the same time some rigidity is important in order to overcome the friction caused by elbows and other cables. The choice and size of material will dictate this delicate balance. For instance nylon ‘fish tape’ is the traditional installer’s aid with the advantage of low cost, but it suffers from a tendency to tie itself into knots, and it can be too flexible. On the other hand GRP (fibreglass) with a polypropylene coating is regarded as a near perfect material because it offers a very high flex/strength ratio, and when uncoiled there is no tendency to ‘recoil’ or kink – it is however more expensive! Another thing to consider is the ease of handling. Good coiled products will come in a housing or case. This not only protects the material it also improves the convenience and speed of use.

### New Blitz Coiled Installation Tool

The Blitz is a professional solution for cable installation, manufactured from 3mm diameter Fibreglass rod encompassed in a robust Polycarbonate case with the facility to fully unwind & rewind the coil quickly and easily.

**Features**
- Fast easy cable installation
- Dynamic case allows easy feedout and rewind over longer distances
- No tangles due to its high quality rewinding mechanism
- Cover multiple bends in conduits
- Non-conductive

**New Snatch Strap - Cable Pulling Accessory**

Time is money and when you think about it, a lot of time is spent stripping, taping and untaping wire for fishtape pulls. The Snatch Strap gives you back this time. Because it stays on the wire, you can pull more conductors with less effort. Because Snatch Straps can be daisy chained, you can easily drop wire groups at boxes along the pull.

**Features**
- No stripping required
- No Tapping required
- 3 Straps per kit
Telescopic Pole

Telescopic extendable poles with a polyester resin baked enamel coating for durability. Available in lengths of 5 and 8 metres. Ideal for quick cable routing.

### Cable Rod Merchandising

The Cable Rod merchandiser has been designed to provide stockists with an effective solution of displaying the range of Cable Rod products. Designed to be space efficient whilst still providing maximum point of sale presence the Cable Rod merchandiser is an excellent tool to maximise sales of the Cable Rod range.

**Cable Rod merchandiser benefits:**
- Increased sales.
- Increased profitability.
- Supplying an innovative market leading brand.
- Increased product visibility and impulse buying.
- Increased Cable Rod set sales will result in an increase in sales profits for the wide range of attachments.
- Access to HellermannTyton Sales / Marketing support to generate further revenue.

### SuperCam V5 - SRCAM

**Wireless Infra-red Inspection.**

The Tradesman’s ‘third eye’!

SuperCam V5 is a camera inspection system designed to work alongside the Cable Rod system. Suitable for use in a variety of everyday situations; the camera is the ideal tool for real time inspection. The Tradesman’s “third eye” allows you to remotely view inaccessible areas with minimal disruption to the worksite.

A first for the electrical industry – totally wireless at an affordable price.

Using the SuperCam allows you to inspect:
- Cavity Walls
- Underfloors
- Over Ceilings
- Blockages in Ducting
- Cable Routes
- Snags in Plasterboard
- Cable Faults.

**Kablemate**

Designed by busy installers, the Maxum is portable and can take up to 10 drums of cable. It has proved over and again to save hours of frustration and fewer accidents by ensuring no trailing cable, easy spooling and no snagging.

Super Rod and the Kablemate Maxum work perfectly together, the rods and attachments allow you to route the cable whilst being backed up by the Maxum’s sturdiness, stability and low friction cable disbursement.

**Couple with this, the obvious Health and Safety advantages (how many times have you fallen over reels of cable?)!**

The synergy between these two products just makes perfect sense. Imagine the scenario – you need to install cable and lots of it – you have a small enclosed space to work in and some difficult to access areas in which to route. This is the natural domain for Cable Rod and Kablemate.

**Rack-A-Tiers® - The Dependable Multi-Purpose Premium Wire Dispensing Tool**

With RACK-A-TIERS you’ll experience unmatched versatility!

- Ease of transport and storage
- Lightweight
- Durable one piece construction
- Waterproof, easy-clean
- Won’t rust or rot
- Won’t mark surfaces
- Made of recycled material
- Made in Canada

**The ONE TOOL that does it all!**

- Wire dispenser
- Pipe vise
- Saw horse
- Work bench
- Wall shelf
- Table

**Cable Pulling Stands**

- Unmatched ease & speed of set up
- Excellent versatility of use
- Accommodates wide range in cable sizes
- Loads of up to 150Kg (330lbs)
- Has 5* 1 3⁄4” (44.5mm) holes, 3* carry handles, & 2* V notches to hold larger cable bars
- Easy to store & transport
- Contractor to supply the conduit/bars for the mounting on the Rack-A Tiers

**Yellow 77® Wire Pulling Lubricant**

- Wax based formula provides superior lubricity
- Safe to use with most cable types except low-density polyethylene and semi-conducting jackets
- Won’t break down or separate after repeated exposure to freezing temperatures
- Dries to a thin, non-conductive film that won’t clog conduit
- Clings to cable throughout long pulls
- Easy to apply by hand or with pump
- Creamy texture applies easily and uniformly
- Homogeneous blend requires no mixing
- Won’t dry out - surface coat forms to control evaporation
- Environmentally safe - non-toxic, non-flammable and non-corrosive

**Aqua-Gel® II Cable Pulling Lubricant**

- Polymer-based formula provides maximum tension reduction in high-stress electrical and communications cable-pulling operations
- Compatible with all cable types
- Cleans up easily with soap and water
- Remains stable over wide temperature range - usable from 28ºF to 180ºF (-2ºC to 82ºC)
- Dries to a semi-fluid film that won’t clog conduit
- Clings to cable throughout long pulls
- Easy to apply by hand, brush or pump
- Environmentally safe - non-toxic, non-flammable and non-corrosive

- Accommodates wide range in cable sizes
- Loads of up to 150Kg (330lbs)
- Has 5* 1 3⁄4” (44.5mm) holes, 3* carry handles, & 2* V notches to hold larger cable bars
- Easy to store & transport
- Contractor to supply the conduit/bars for the mounting on the Rack-A Tiers

**Yellow 77® Wire Pulling Lubricant**

- Wax based formula provides superior lubricity
- Safe to use with most cable types except low-density polyethylene and semi-conducting jackets
- Won’t break down or separate after repeated exposure to freezing temperatures
- Dries to a thin, non-conductive film that won’t clog conduit
- Clings to cable throughout long pulls
- Easy to apply by hand or with pump
- Creamy texture applies easily and uniformly
- Homogeneous blend requires no mixing
- Won’t dry out - surface coat forms to control evaporation
- Environmentally safe - non-toxic, non-flammable and non-corrosive

**Aqua-Gel® II Cable Pulling Lubricant**

- Polymer-based formula provides maximum tension reduction in high-stress electrical and communications cable-pulling operations
- Compatible with all cable types
- Cleans up easily with soap and water
- Remains stable over wide temperature range - usable from 28ºF to 180ºF (-2ºC to 82ºC)
- Dries to a semi-fluid film that won’t clog conduit
- Clings to cable throughout long pulls
- Easy to apply by hand, brush or pump
- Environmentally safe - non-toxic, non-flammable and non-corrosive
