VIRALERT 3

SAFE | EASY | ACCURATE

IDEAL FOR INSTALLATION IN:

- PORTS AND CRUISE LINERS
- AIRPORTS
- BUS AND RAIL STATIONS

HUMAN BODY TEMPERATURE SCREENING SYSTEM

“

The VIRALERT is quick and easy to use, we've integrated the system into our document check station which gives passengers extra confidence without slowing the flow.

Dave Laut, Safety & Security Manager, Poole Port Authority

”

SAFE, ACCURATE TEMPERATURE SCREENING YOU CAN TRUST

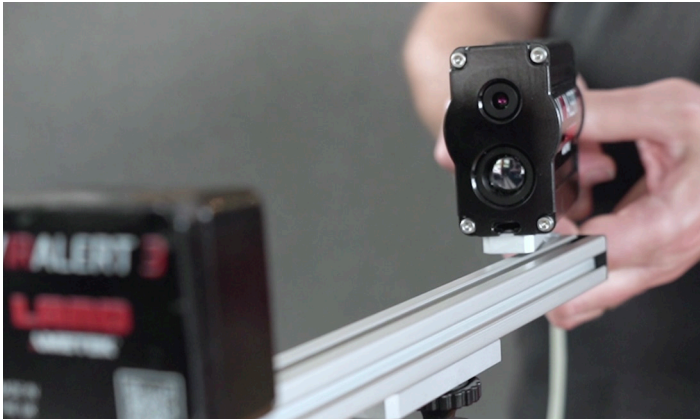

SMALL AND DISCREET

With the camera and reference source on the same arm, the VIRALERT 3 easily fits on a tripod, flat surface, or wall mount. Lightweight and compact, it is a non-intrusive presence, even in confined or busy spaces.

MEETS THE NEEDS OF YOUR SITE

Whether you need complete automation or supervised screening, the VIRALERT 3 provides the solution. It detects faces automatically, scans to determine body temperature, then outputs a visual and audible alarm to a connected laptop.

QUICK AND EASY TO SET UP

Simple to set up and operate, the VIRALERT 3 can go from the box to fully operational in less than 30 minutes. Automated operation ensures accurate results while removing operator error from the equation.

DESIGNED TO HELP KEEP PASSENGERS AND STAFF SAFE

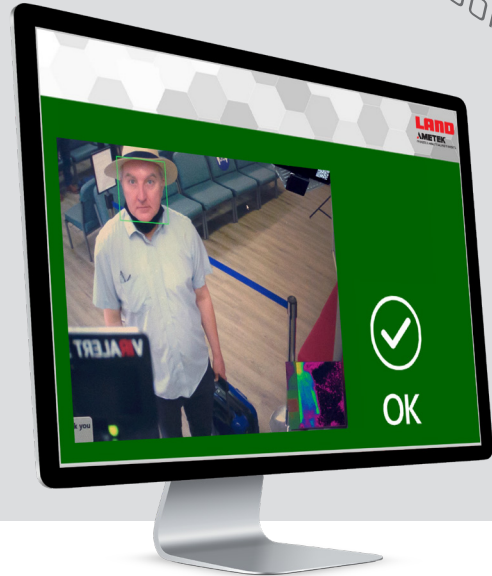

VIRALERT 3 INTEGRATED SCREENING SYSTEM

ACCURATE

- Integrated black body source ensures reliability
- Supported by 70+ years of industry expertise
- Automatic face detection to prevent errors

SAFE

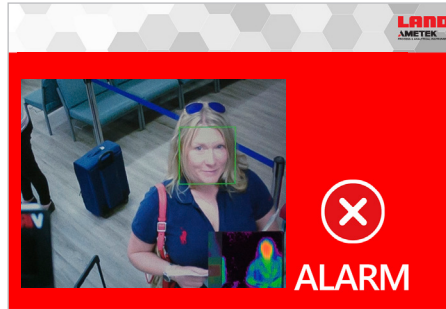

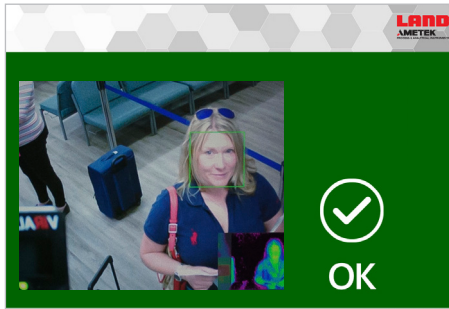

- Non-contact temperature monitoring camera
- Immediately detects elevated skin temperature
- Maintains social distancing

EASY

- Intuitive user control
- Audible alarm and on screen notification
- Automated operation option

SAFE SCREENING – INSTANT, NON-INTRUSIVE INFRARED THERMAL IMAGING FROM A DISTANCE
FAST RESPONSE – MONITOR VISITORS WITHOUT SLOWING THE FLOW OF PEOPLE
HIGHLY ACCURATE – DEVELOPED BY WORLD-LEADING TEMPERATURE MONITORING EXPERTS

Accurately detect elevated temperatures, which can indicate a fever, a symptom of COVID-19 – international and national organisations, including the FDA and NDAA, recommend body temperature screening to help prevent the spread of COVID-19.

Working alongside other precautionary measures, the accurate, compact VIRALERT 3 screens visitors at entry for elevated body temperatures.

Unlike handheld thermometers which compromise social distancing,

the VIRALERT 3 automatic screening system scans in compliance with social distancing and meets the requirements currently set out by the FDA and similar authorities. Visual and audible alerts provide the warning you need to keep everyone safe.

Developed over ten years by AMETEK Land's world-leading temperature monitoring experts, the VIRALERT 3 is a real-time scanning solution that's safe, accurate, and easy to use.

The VIRALERT system is great, it's quick and accommodates all our members from the very tall 6' plus down to our junior members as young as five.

Tom Morton, General Manager, Tennis & Squash Club

Quick and easy to use, it's now standard procedure, and has really helped create confidence for staff coming back into the office.

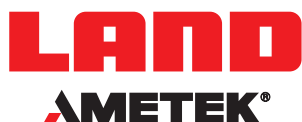

Global Electronics Manufacturer

We love the camera and the impact it's having on everyone, staff and patients.

UK Medical Centre

Disclaimer: Human skin temperature is affected by a wide number of environmental and physiological factors. Elevated facial skin temperature may signify a raised body core temperature; correspondingly, an elevated core temperature may not be accompanied by a raised facial skin temperature. VIRALERT systems are accurate scientific systems that must be operated strictly in accordance with the manufacturer's operating manual. VIRALERT systems are not intended, nor designed, nor to diagnose or detect medical conditions including, but not limited to, viruses or other illnesses. AMETEK Land thermal imaging products should only be used to detect variations of surface temperature. If elevated skin temperature is detected, the finding should be confirmed by other means, for example, an approved medical thermometer. The absence of an elevated skin temperature does not exclude a fever. Images shown in this document are for illustrative purposes only.
