

Industry-Ready Remote Access Lab Solution

Real-world lab experience – Simply at a distance

The Megatrend of Remote Learning

Online learning has been a part of many educational institutions since the spread of the Internet. Now, new norms such as physical distancing and limits on face-to-face interaction is dramatically accelerating the shift from traditional in-building learning to virtual classes offered remotely on digital platforms. The availability of online courses opens opportunities to international and distance learning students, and remote learning offers students the flexibility of learning anytime, anywhere. With these benefits, online learning is expanding exponentially, and educational institutes must rapidly transform to keep pace with this megatrend.

Keysight Solution

Keysight's industry-ready remote access lab solution offers you a convenient way to make the switch to online learning. This end-to-end solution is designed for complete remote setup of your basic instrument lab and covers your needs from web-based lab management and scheduling administration to instrument control and remote access for measurement and analysis. And since your students continue working with industry-grade test and measurement instruments and software, they will gain the similar practical skills and application knowledge as industry engineers conducting their work in the lab today.

End-to-End Remote Instrument Lab Solution Overview

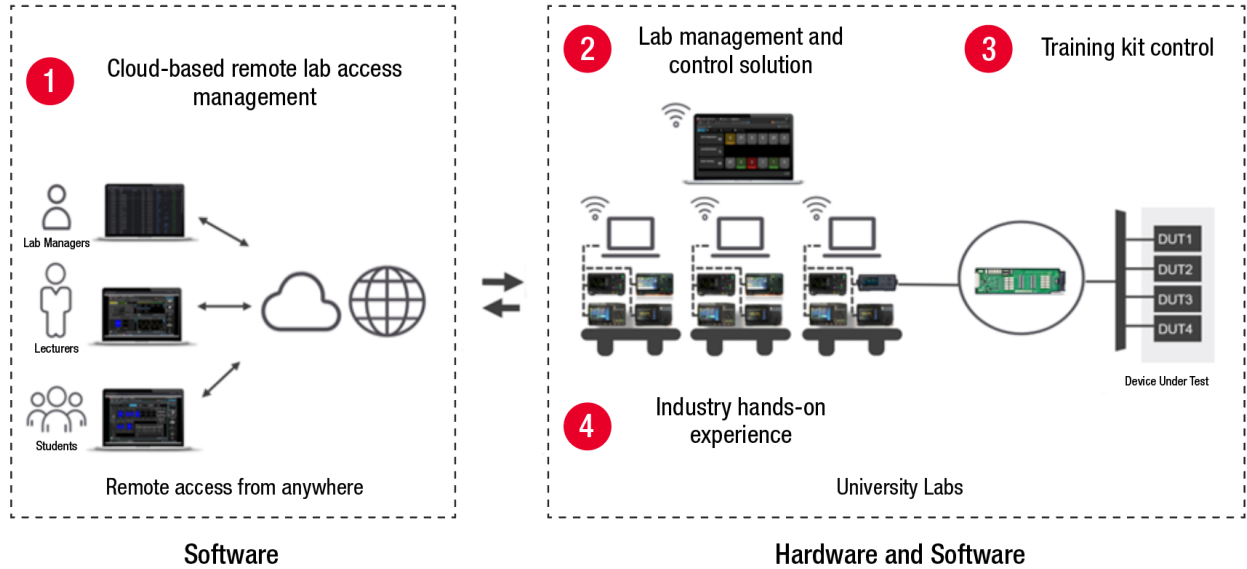

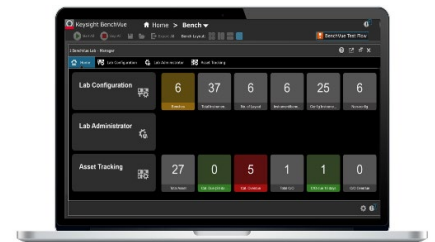

Figure 1. Keysight Industry-ready Remote Access Lab Solution

1. Secured Cloud-based remote lab scheduling and session booking – Coming soon in 2021
2. Centralized lab configuration, and multi-bench lab setup and control
3. Remotely switch between different training kits or measurement points during a lab session
4. Access industry-graded instruments

BV9111EDU Lab Management Software

Software that provides simplified centralized lab configuration and asset management and enables mass firmware updates for instruments.

What It Offers:	
For Educators	To manage and configure lab instruments for multi-bench setup
For Students	To access multiple instruments application and controls remotely

U3900DAQ Switching System

Powered by industry-proven, software-controlled switching system, the U3900DAQ covers a broad spectrum of switching and routing requirements for your teaching lab.

What It Offers:	
For Educators	To provide students with full access to existing lab instruments
For Students	To access industry-standard instruments for actual test and measurement experience

Keysight Test and Measurement Instruments

Keysight offers a wide variety of basic bench instruments that cater to the needs of each teaching lab.

Electronics & Computer Engineering Instruments	
Electronics Lab	Function generator, Digital Multimeter, Power Supply and Oscilloscope
RF Lab	Network analyzer, Signal analyzer and Signal generator

Remote Access Lab Solution Benefits

- Easily and seamlessly migrate engineering labs online faster**
 The end-to-end solution offers all the elements needed to transform traditional classroom teaching and hands-on labs to a remote environment
- Equip students for success in the industry**
 Connect to industry-grade test and measurement instruments and utilize the same software and technology they'll use in their careers
- Interact with their students and facilitate group collaboration in real-time to accomplish smart teaching and learning**
 Multi-user access so students, educators and lab administrators can access the lab at any time, from anywhere
- Streamline and simplify lab management, saving lab administrators and educators time and freeing them to focus on teaching**
 Centralized control for educators to seamlessly connect to, manage, monitor and troubleshoot all the instruments within a lab

Conclusion

The Keysight industry-ready remote access lab solution takes remote learning to the next level of digital transformation, moving you beyond simulation and theory to real-world experience - simply at a distance.
