

## Vehicle tracking.

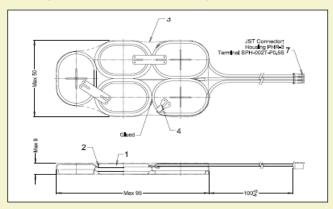

The introduction of new legislation relating to the fitment of tracking systems on all new vehicles from 2009 in Brazil, will require significant design modification to vehicles and manufacturers. Car theft and vehicle tracking requirements in Brazil and changes to insurance requirements in Belgium, Holland, Sweden, India and North America indicate the trend for extended demand in vehicles tracking

## Battery challenge.

The combination of GPS and GSM system and the need to have sensor data from various positions inside the car requires an independent and powerful battery that is able to reliably work in the harsh automotive environment over the extended temperature range. Battery must be robust and rechargeable to withstand car crash and be steadily available at any time.

## **Technical solution**

The V500HT cell out of the powerful85 family of Ni-MH button cells from VARTA Microbattery is specially designed for high discharge currents and extended temperature.

Characteristics	5/V500HT Battery
Voltage level	6.0V (other voltages possible)
Peak discharge current	Up to 1.5A
Capacity	500mAh
Discharge Temperature range	-20°C to +85°C
Overcharge capability	0.03CA continuous
Weight	70g

## **Car Tracking Battery**

VARTA Microbattery's Ni-MH HRT batteries (powerful85 family) offer rechargeable battery solutions with reliable power for supplying GPS and GSM Module in case of theft of car for tracking and locationing of vehicle. Recommended configurations: 4/V500HT, 5/V500HT or 6/V500HT depending on temperature and power demand.

- wide temperature range from -20 to +85°C
- long lifetime up to 10 years
- high reliability by special sealing construction with new plastic materials
- high current capability with stacked electrodes
- design flexibility on voltage level from 1.2V to 12V
- design flexibility on battery shape side-by-side or stacked
- simple charging system continuous charging possible
- UL recognized cell
- environmentally friendly Ni-MH technology
