

❖ SCS CALIBRATION STANDARDS

Description

ROTRONIC Non-Saturated salt calibration standards are an accurate and dependable means of checking the calibration of any % rh measurement device. In combination with our wide range of calibration devices, they provide a known %rh value and are supplied as standard with a certificate of calibration, either SCS (Swiss calibration Service) or UKAS (United Kingdom Accreditation Service).

Technical Data

Non-saturated salt solutions	
Simple handling	
Sealed glass ampoules	
Long shelf life	10 years guaranteed
Ready-to-use solutions	
SCS-certified	
Traceable to national standards	
Specific calibration devices	
Optimum volume for each probe	

Applications

Calibration on-site, in workshops on laboratories
