Modern Wiring Practice

W.E. Steward & T.A. Stubbs

Revised Edition

An up-to-date source of reference to electrical design and installation, meeting the requirements of the 2004 version of the IEE Wiring Regulations BS 7671:2001 (incorporating Amendments 1:2002 & 2:2004). This compact and practical guide addresses wiring systems design and electrical installation together in one volume, creating a comprehensive overview of the whole process for contractors and architects, as well as electricians and other installation engineers.

- Best practice is incorporated throughout
- Combining theory and practice with clear and accessible explanation
- A classic handbook for the trade, designed for a wide range of professionals
- The fundamentals of design and installation with a minimum of mathematics
- An essential purchase for all students of electrical installation courses, such as the 2330 certificate in Electrotechnical Technology and NVQs from City & Guilds (including 2356 and 2391, 2381, 2400 awards), trainees in industry undertaking apprenticeships and advanced apprenticeships
