

EAN:	4013288220172	Size:	280x205x55 mm
Part number:	05022767001	Weight:	660 g
Article number:	3167 i/7 TORX®	Country of origin:	CZ
		Customs tariff number:	82054000

- 7-piece VDE Stainless screwdriver set for use in stainless steel couplings
- Insulated blades for secure work at 1,000 volts
- Multi-component Kraftform handle for high working speeds and ergonomic screwdriving
- Take it easy tool finder: colour coding according to profile and size
- Blades made of stainless steel to prevent extraneous rust

7-piece VDE screwdriver set made of stainless steel. Wera's stainless steel tools are vacuum ice tempered and therefore have the hardness and strength properties required for screw connections. Industrial use is possible without restrictions. Safe working at voltages up to 1,000 V is guaranteed by the Kraftform Stainless VDE screwdrivers individually tested at 10,000 V as per DIN EN 60900 (IEC 60900). The tested cold impact resistance at -40° C ensures safety even under extreme operating conditions. Multi-component Kraftform handle for fast and gentle work. Take it easy tool finder with colour coding by profile and size stamping - to help you find the required tool quickly and easily. The hexagon anti-roll protection avoids bits from rolling away annoyingly at the workplace.

Our Autumn/Winter production innovations

Set contents:

3167 i TORX® VDE

05022760001	1 x TX 8 x 80 mm
05022761001	1 x TX 9 x 80 mm
05022762001	1 x TX 10 x 80 mm
05022763001	1 x TX 15 x 80 mm
05022764001	1 x TX 20 x 80 mm
05022765001	1 x TX 25 x 100 mm
05022766001	1 x TX 30 x 100 mm

Screw stainless steel together with stainless steel!

Solution to the rust problem: screw stainless steel together with stainless steel! Wera stainless steel tools are manufactured out of stainless steel so unsightly rust can be avoided.

Vacuum ice-hardened

The stainless steel tools from Wera are vacuum ice-hardened and have the hardness and strength needed for screw connections. There are no limitations to the industrial applications they are suitable for.

Individually tested

The individual testing at 10,000 volts, in accordance with IEC 60900, ensures safe working with loads up to 1,000 volts.

Kraftform

The basic idea for the prototype of the Kraftform handle – that the hand should dictate the design – has, right through to today, proved to be correct. In cooperation with the internationally recognised Fraunhofer IAO Institute, Wera developed a screwdriver handle designed to match the shape of the human hand as long ago as the 1960s. After a long development phase, the Wera Kraftform handle was launched to the market in 1968. It has been optimised through the years with new technologies, but has kept its proven shape. After all, the human hand has not changed either.

Non-roll feature

The hexagonal non-roll feature prevents any rolling away at the workplace.

Prevents hand injuries

The outstanding design of the Kraftform handle that fits perfectly into the hand prevents hand injuries such as blisters and calluses.

Rapid hand repositioning

The hard materials used for the handle ensure rapid hand repositioning without any danger of the skin "sticking" to the handle. The surrounding hard zones with large diameters glide like wheels across the hand.

"Take it easy" Tool Finder

Colour coding according to profile and size stamp. This enables faster and more reliable selection of the correct tool from the tool case.
