

Pen-Style Control Cabinet Key with voltage tester

do-it-yourself test by means of an optical standby indicator for more certainty

Pen-Style Control Cabinet Key with voltage tester

New additional feature allows reliable detection of alternating current in insulated cables, conductors, plugs and power sockets; also without current flow. After switching-on an LED indicates the readiness for operation; this provides certainty in application.

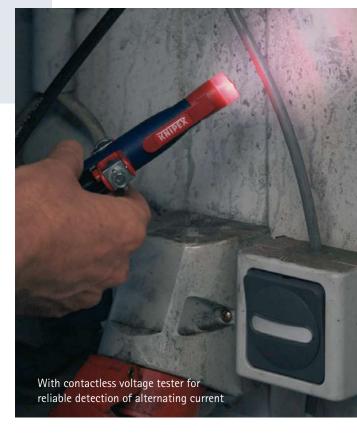

- with voltage tester for contactless detection of alternating current 50–60 Hz
- easy to carry pen-style control cabinet key with fastening clip
- four different key profiles can be utilized by swivelling the key holder
- for control cabinets and shut-off systems in the supply of gas, water and electricity
- for technical installations in buildings, e. g. air conditioning and ventilation systems, shut-off valves, mains switch-boards, etc.
- magnetic 1/4" bit adapter for standard bits as well as additional bit adapter for 1/4" bits inside one key profile
- cross recess PH 2 bit included
- battery compartment with bayonet catch for easy battery exchange (2 x LR44)
- corpus and fastening clip made from plastic material; tool holder and key profiles of diecast zinc
