

- Superior chemical, heat and wear resistant
- Easy to clean
- · Low reflecting
- Choice for applications using chairs with casters

## **Specifications**

**Abrasion**: 5N (ISO 4649, method A)

**Thickness:** 2.5mm (<u>210926</u>) to 3.5mm (<u>210927</u>)

Hardness (ISO 7619): 85 ±5 shore A

**Colours\*:** Light Grey (<u>210926</u>) and Dark Grey (<u>210927</u>)

**Cleaning:** For optimum electrical performance, surface must be cleaned regularly using an ESD mat cleaner, such as Reztore™ Surface & Mat Cleaner. Do not use cleaners with silicone. Silicone buildup will create an insulative film on the surface.

Item	Description
<u>210926</u>	Roll, Light Grey, 2.5mm x 1.9m x 10m
<u>210927</u>	Roll, Dark Grey, 3.5mm x 1.2m x 10m

<sup>\*</sup>Colour and texture may vary between lots and mills

- the total resistance of the system (from the person, through the footwear and flooring to ground) shall be less than 1.0 × 109 Ω:
- the maximum body voltage generation shall be less than 100 V." [IEC 61340-5-1 Clause 5.3.3 Personnel Grounding]

"The use of floor materials to control personnel or equipment generated static has a number of benefits. Floor materials tend to be passive. Employees who work in areas protected with floor materials simply need to wear and test the appropriate footwear. They do not need to implement any additional actions themselves to assure that the floor material is functioning properly.

Floor materials, particularly floor coverings, finishes, and coatings, can be applied or installed throughout the work environment providing a broad area of control rather than isolated control at individual workstations. They improve the mobility of personnel who work in the environment. Finally, floor materials can help control static on trolleys or other mobile equipment if properly grounded."

[CLC/TR 61340-5-2 User quide Clause 4.7.3.4 Benefits of floor materials]

Made in Italy
