

Protective Clothing

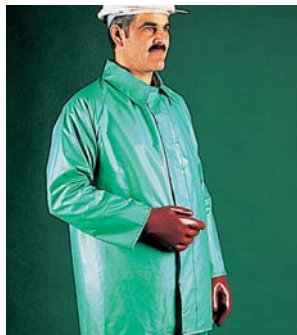

NORTHYLON

The popular, widely used Northylon range of Chemical Resistant Clothing is manufactured from a 339 gms/m² PVC coated nylon fabric. The material has exceptional mechanical strength, offering a high degree of tear and abrasion resistance, therefore prolonging the life of the garments. The Northylon range of garments offers excellent resistance to acids, alkalis and other hazardous chemicals. All garment seams are sewn and welded a high bursting strength to increase protection against the penetration of harmful liquids.

NORTHYLON JACKET

The jacket is designed to be worn with the Northylon Trousers, to achieve overall protection from chemicals. The jacket has a turn-down collar and long sleeves and fastens down the front with plastic coated metal studs. Northylon Trouser with elasticated waist.

NORTHYLON CHEMICAL SPLASH HOODS

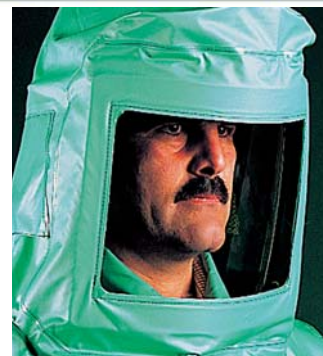

The Northylon range of splash Hoods, made from the same high quality NCN101 PVC coated material, are designed to achieve overall head and neck protection from hazardous chemicals.

All hoods have an elasticated headband and therefore one size will fit most head sizes. A variety of styles are available to suit all protective needs.

FSN

The ultimate in chemical protection for the head, neck and shoulders. FSN is designed for use with a safety helmet and features include: fully enclosed hood providing excellent all round visibility and anti-mist visor with yoke vent on apron front to help circulate and minimise lens fogging. External PVC hook for easy cleaning operations.

- FS2N Cap with neck and shoulder cover, fixed visor and apron front.
- FS3N Cap with fixed visor and neck cover
- FS5N Cap with fixed, ventilated visor, neck and shoulder cover, apron front with stud fastening attachment to neck cover.
