Client Name:

Part Number: TAU0730TM-14

Client Part Number:

1. Applicability

This specification applies only for Open frame solenoid TAU0730TM-14

2. Standard test conditions

2-1 Environment Ambient temperature: 60 ±2°C

Relative humidity: 65 ± 5%

Atmospheric preesure: 1013mbar

2-2 Test load Empty load

2-3 Power supply Adjustable DC 12V power supply

2-4 Test Method

- (1) Attraction force: when the armature is in a vertical position, push style conducts pressure test while the pull style conducts tensile test.
- (2) The initial force : read by the *force vs stroke graph* on the specifiedstroke range.
- (3) Retentivity: read by the *force vs stroke* when energized closed.

3. Outside drawing

3-1 Overall dimension: refer to page 3

4. Nominal parameter

4-1 Voltage (According to the clients reqirement, recommend voltage are DC12V, DC24V,

DC36V): ••• DC 12V

4-2 Resistance (20°C): ... 40 Ω

4-3 Current (I=U/R ±5%) : ••• 0. 3A

4-4 Power (P=U²/R): ... 3.6W

4-5 Duty cycle (ED= Power on duaration/ (Power on duaration+ Power off

duaration)*100%): ... 50%

4-6 Insulation grade (According to the clients requirement, B or F): ... B

Client Part Number:

5. Electrical characteristics

5-1 Attraction force

| Items | Stroke (mm) | Force (N) | | |
|--------------------|-------------|-----------|--|--|
| The intitial force | 4mm | ≈0.5N | | |
| Retentivity | Omm | ≥5N | | |

5-2 Insulation resistance

Between coil and frame $\underline{100M \ \Omega}$ (DC $\underline{500}$ V in regular temperature/humidity).

5-3 The withstanding voltage

Between coil and frame AC $\underline{500}$ V ($\underline{50}$ / $\underline{60}$ Hz) $\underline{1}$ Min or AC $\underline{1000}$ V ($\underline{50}$ / $\underline{60}$ Hz) $\underline{1}$ Sec (breakdown current $\underline{0.15}$ mA) .

5-4 Temperature rise

At the rated voltage of DC12 V, temperature rise is $\underline{65}$ °C Max(power on $\underline{1}$ sec, power off 1 sec).

5-5 Life time

Normally is <u>50000</u> times (power on <u>1</u> sec, power off <u>1</u> sec) .

5-6 Lead strength

When it is loaded ___1_kgf (__30__sec), broken is not allowed.

5-7 Operation temperature and humidity

 $\underline{\text{--5}} \ ^{}\mathbb{C} \sim \underline{\text{ 60}} \ ^{}\mathbb{C} \text{, } \underline{\text{45}} \ \text{ } \text{\%} \text{RH} \sim \underline{\text{85}} \ \text{ } \text{\%} \text{RH}$
