

Serial File Transfer Cables

RS232 Serial File Transfer Cables

Part No: See Chart

The cables feature either the traditional 25 D type RS232 connector or the now more commonly fitted 9 D type serial connector. As the serial port on most PCs is a plug or male the most common interface cable tends to be a socket to socket (female to female).

Features & Benefits

- Now recognised as conforming to the most standard file transfer wiring configuration
- Both serial port configurations (Pt Nos 4070 & 4062) available from stock
- High quality moulded cables manufactured using foil screened cable
- Custom lengths can be made up upon request
