

CREALITY

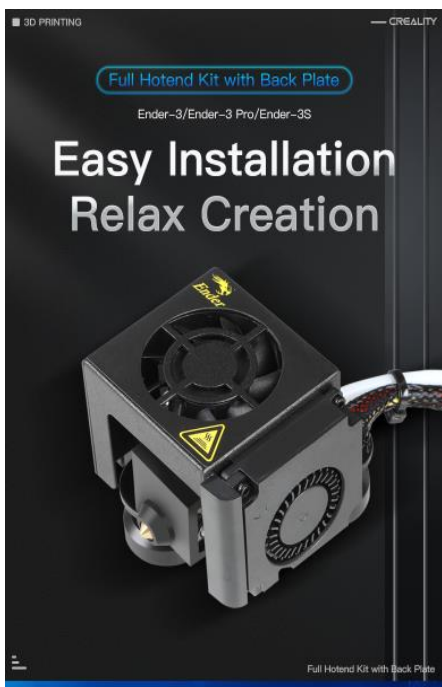

Full Hot end Kit with Back Plate

MFR: 4001030004

### Product Information

No Clogging's  
High Precision  
Steady Structure  
Stable Dperation

## 01 Easy Installation

Integrated design, equipped with extruder back plate and V wheel, one step installation on the X axis table.

## 02 As Firm As Stone

Sheet metal housing frosted texture, firm and durable

## 03 Exquisite Hotend Nozzle

Design by Creality, brass hotend nozzle, bullet design, more even heating, fewer cloggings, more smooth filament feeding.

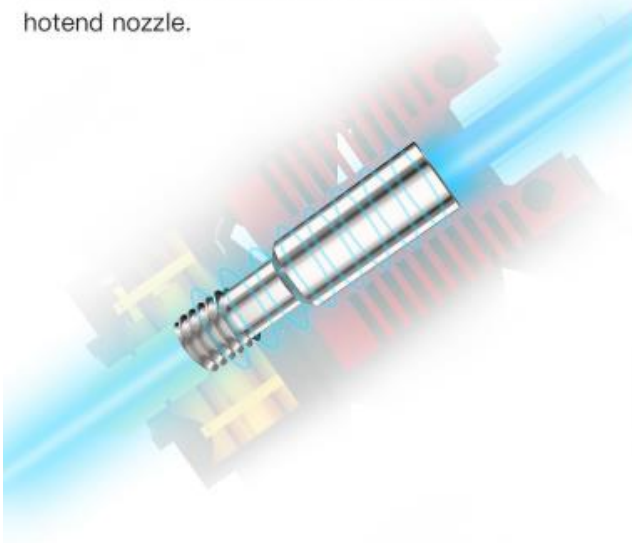

## 04 Highly-effective Heating and Heat Dissipation

Heating Block+Heat dissipation block+Fan, well temperature control, steady and reliable printing Fan design, more even heat dissipation, faster printing process.

## 05 Newly Upgraded Throat Tube

Super-thin wall thickness, reduce losing heat from heating block, strengthen work stability of hotend nozzle.

## Extrodinary Details

### Teflon Tube

Optimised Design, Fewer cloggings, and smoother extrusions.

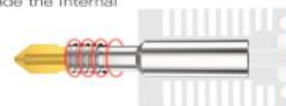

### Thermistor + Heating Tube

Rapid heating, precise temperature control, temperature detection up to 260°C.

### Nozzel+Throat Tube

Seamless connection, upgrade the internal design, no worries of clogging when working for a long time!

Good Hotend, Great Creation

## Product Parameter

Name

**Full Hotend Kit with Back Plate**

N.W

**260g**

Material

**Metal**

G.W

**388g**

Packing Size

**165\*155\*85mm**
