

CREALITY

3D PrintMill (CR-30) Hotend Kit

MFR: 4001030010

Product Information

Efficient Printing

Stable Operation

Intelligent Anti-clogging

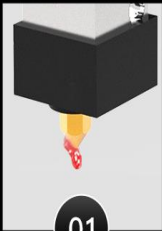

High-Performance Hotend,
Capable & Exquisite

Support you all the way from inspiration to creation

In Trouble With These
Printing Issues?

...

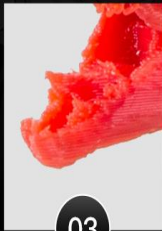

01

Blocking

02

No smoothly running

03

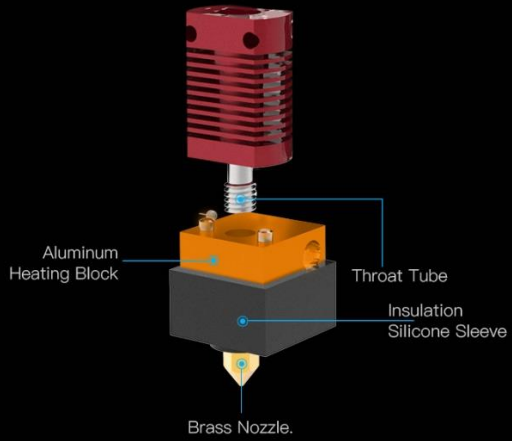

Low efficiency

Say Goodbye To Clogging,
Be The Master of 3D Printing.

Exquisite Mechanical Structure

High-precision process standard, strong and durable using,
integrated design, easy cable connection,
simple disassemblies and maintenances.

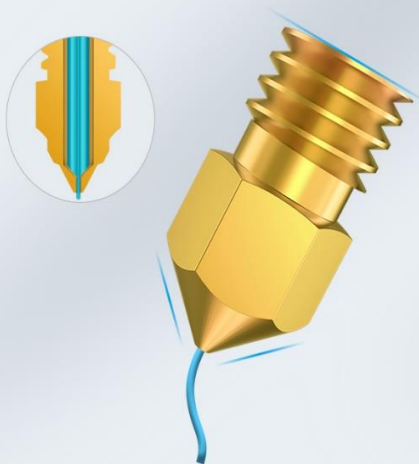

...

Brass Nozzle

Design By Creality, Bullet type nozzle with smooth inner surface,
for better extrusion.

...

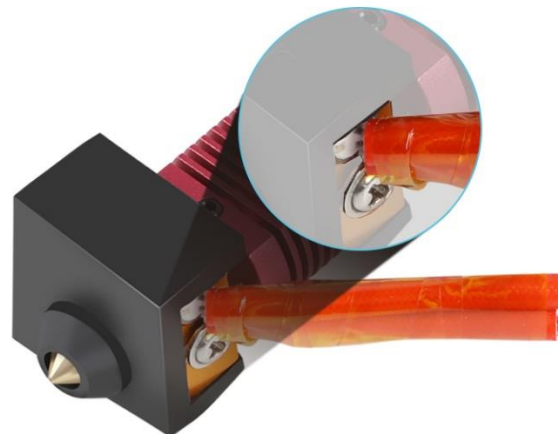

Precise Temperature Control

Thermistor + Heating Tube

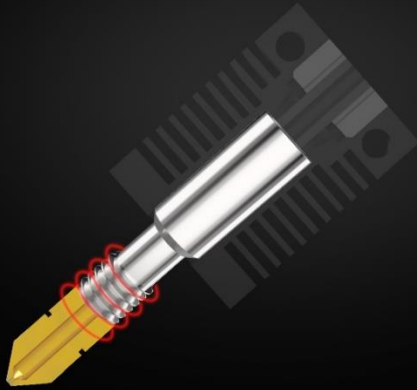

Rapid heating, precise temperature control,
temperature detection up to 260°C

...

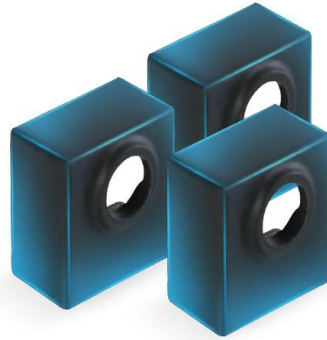

Nozzle + Throat Tube

Seamless connection, Upgraded inner design,
no worries of clogging after long time working.

Silicone Heat Block Sock

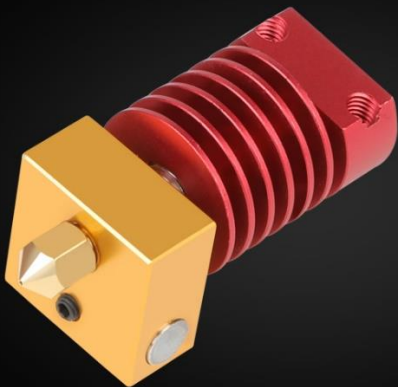

Flame-retardation material, good thermal insulation,
effectively maintains the cleanliness of heating block and nozzle.

High-effective Operation

Heating Block+Cooling block

Highly effective heating and cooling,
fewer cloggings, higher printing success rate.

Good Hotend, Great Creation

Product Parameters

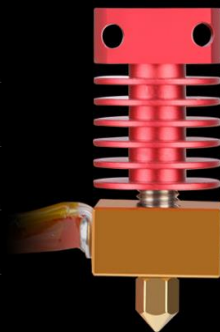

Name: 3D Print Mill Hotend Kit

Application: 3D Print Mill

Package size: 165*155*50mm

Net weight: 83g

Gross weight: 180g
