3D Printing Brass Nozzle 1 PCS

Smooth inner wall without glitches, smoother filament-pushing

Nose with chamfer, Round nozzle

MFR: 4004020002

Item Number: D6-0.4mm

3D PRINTING BRASS NOZZLE

Delicate workmanship | Smooth filament-pushing | Precise molding

International brass
Better thermal conductivity higher hardness

Narrow-nosed nozzle
Chamfering Craft

Smooth inner wall
Without glitches

Even filament-pushing
No more and no less

High-end Craft
Excellent quality

All Series
Various models available

Nozzle anatomy

Name: Brass nozzle

**Material:** International brass

Size: 6mm*13mm

Compatible filament size:1.75

**Compatible nozzle tip size:** 0.1,0.2,0.3,0.4,0.5,0.6,0.8,1.0,1.2mm

---

1.75mm filament apply to nozzle of 2.0mm inner diameter

3.0mm filament apply to nozzle of 3.2mm inner diameter

6mm

13mm

8mm

Ø0.4

Ø2

M6X1

CREALITY

International brass craft
Better thermal conductivity, higher hardness

Print better quality with excellent thermal
conductivity and wear—resistant

Common nozzle ⊗   International brass nozzle ⊘

VS

Most flaws is appeared if model
printed with common nozzle
⊗

Smooth surface if model printed
with international brass nozzle
⊘

Smooth inner wall without glitches
# Smoother filament–pushing

Smooth inner wall without glitches, low viscosity, and smoother filament–hopper
Meanwhile, the craft that the model printed with common
nozzle is not mature enough
Rough inner wall and concave convex surface make
filament come out unsmoothly

Smooth inner wall
smoother filament–pushing

VS

Common nozzle ⊗

International brass nozzle ⊘

Nose with chamfer
Round nozzle

Chamfer craft and smooth surface reduce the resistance to filament
so that the filament come out smoothly, feed in easier
and rarely block the nozzle

Common nozzle ⊗   International brass nozzle ⊘

Seamless junction

Seamless junction prevents filament leakage from nozzle head
