Overview

- Delivery Unit Change for the 42001 Strain Relief Terminals
 - Change is part of an improvement program standardizing Delivery Unit values to align with packaging standards and ensure product quality.
 - Reduce repackaging of parts from the standard production packaging.
 - Improve customer service by reducing errors in ordering/delivery
- Part Numbers Impacted
 - See attached list
- Product Impact
 - No change in fit , form or function
 - No change in part production
- Delivery unit change only
 - Level 1 PPAP will be provided upon request
 - Package dimensions to ship 1-reel measures 1.5" without tuck corners for compression strength. The change to the 4-reel carton 5" tall with tuck corners for increased handling protection.

Additional Information :

Dimensional Analysis of Packaging

- Current Packaging is 1 reel (20,000pcs) in Box 85-01-0015
 - Box Dimensions are 24 x 24 x 1.5"
 - Box has a center glue joint which is a weak spot for our terminal design (as shown on slide 1 before photo)
 - Small minor flaps at corners do not allow for compression strength when box is closed allowing corners to crush and potential for reels/product in box to be damaged during shipping and handling.
- New Packaging will be 4 reels (80,000pcs) in Box 85-02-0003
 - Box Dimensions are 24.75 x 24.25 x 4.75"
 - There is no center glue joint to cause a weak spot in the packaging
 - Corners have minor flaps that tuck well and provide the outer corners with additional compression strength during shipping and handling (as shown on slide 1 after photo)
