

## Evaluation Kit for TCS3400

Part: TCS3400-EVM

### General Description

The TCS3400 Evaluation Kit comes with everything needed to evaluate the TCS3400 color sensor. The evaluation kit comprises of a main controller board with a PIC microcontroller, an industry standard USB 2.0 interface (with an USB cable), a TCS3400 daughter card, "plug-n-play" USB HID class drivers, software documentation, and GUI software allowing users to control the color sensor settings as the PIC takes the TCS3400 I2C digital outputs to calculate illuminance in lux and color temperature.
