**SRT2607****115-07269**

The Elasticity of the SRT ties makes them suitable for use in many applications.

Manufactured from a soft, tear-resistant thermoplastic polyurethane these ties have several unique features: UV and weather resistant, strong yet elastic, and suitable for temperatures as low as -40 degrees C. The SRT ties are releasable and reusable which is ideal for bundling cables in temporary applications such as musical events, theatres, cable harnesses.

The SRT range offers solutions to numerous bundling applications. The soft, flexible material makes these ties particularly suitable for use on data and fibre-optic cables. The elasticity of the material makes them ideal for securing young trees to support poles, and other applications within the gardening and landscaping industry.

**Base Data****Colour**

Black (BK)

**Label E-Number Norway**

13 451 51

**Package Content**

50

**Quantity (Sold Unit / EDP)**

50

**Short Description**

The elasticity of the tie means that in applications such as securing trees, it is not necessary to loosen the tie and re-tighten it as frequently as with other products - the tie will grow with the tree.

**Logistic and Packaging****Carton Quantity**

0

**EAN code**
