PXI-2598 Specifications

This document lists specifications for the PXI-2598. All specifications are subject to change without notice.

PXI-2598 Specifications

Specifications characterize the warranted performance of the instrument under the stated operating conditions. Data in this document are **Specifications** unless otherwise noted.

Typical Specifications are specifications met by the majority of the instrument under the stated operating conditions and are tested at 23 °C ambient temperature. Typical specifications are not warranted.

All voltages are specified in DC, AC_{pk}, or a combination unless otherwise specified.

Caution The protection provided by the PXI-2598 can be impaired if it is used in a manner not described in this document.

Input

Caution Use precaution when using the PXI-2598 to avoid electrical shock.

Caution This module is rated for Measurement Category I and intended to carry signal voltages no greater than 100 V. This module can withstand up to 500 V impulse voltage. Do not use this module for connection to signals or for measurements within Categories II, III, or IV. Do not connect to MAINS supply circuits (for example, wall outlets) of 115 or 230 VAC.^[1]

Caution When hazardous voltages ($>42.4 V_{pk}/60 V DC$) are present on any channel, safety low-voltage ($\leq 42.4 V_{pk}/60 V DC$) cannot be connected to any other channel.

² NI recommends against switching active RF signals. As a relay actuates, the channel is momentarily unterminated. Some RF sources can be damaged by reflections if their outputs are not properly terminated. Refer to your RF source documentation for more information.

³ National Instruments recommends against switching RF signals below -35 dBm with this device.

⁴ Certain applications may require additional time for proper settling. Refer to the **NI Switches Help** for more information about including additional settling time.

⁵ The PXI-2598 can recognize trigger pulse widths less than 150 ns if you disable digital filtering. Refer to the **NI Switches Help** for information about disabling digital filtering.
