Type 0AFG
240V, BS88-4 Semiconductor Fuse

Description
BS88-4 style stud-mount Fuse

Features
- High speed semi-conductor fuse
- Full compliance with EU Directive 2011/65/EU and amending directive 2015/863

Applications
Supplementary protection in appliance
AC/DC, DC/DC module for EV/EV charging

Physical Specifications

| Materials	Body : Ceramic
	Terminals : Tin Plated Copper
Marking	On Fuse :
	"bel","0AFGX","Voltage Rating",
	"Current Rating ","Interrupting Rating"
	On Label :
	"bel", "0AFGX ", "Current Rating", "Voltage Rating", "Interrupting Rating" and " RoHS ✔ ", " ⊖ "(China RoHS compliant).

Ratings

| Ampere Rating / Voltage Rating	Ampere Range / Volt @ I.R. ability*
25A -180A / 240V AC 25A -180A / 150V DC	25A - 180A / 240V @ 50kA AC / 150V @ 10kA DC
*I.R.= Interrupting Rating = Short Circuit Rating(Amps)	

Electrical Characteristics

Total Cleaning I²t	Arc Voltage	Power Loss
The total clearing I²t at rated voltage and at power factor of 15% are given in the electrical characteristics. For other voltages, the clearing I²t is found by multiplying by correction factor, K, given as a function of applied working voltage, Eg, (rms).	This curve gives the peak arc voltage, UL, which may appear across the fuse during its operation as a function of the applied working voltage, Eg, (rms) at a power factor of 15%.	Watts loss at rated current is given in the electrical characteristics. The curve allows the calculation of the power losses at load currents lower than the rated current. The correction factor, Kp, is given as a function of the RMS load current, Ib, in % of the rated current.

0AFGxK160Sxx	160A		1100	7000	16000	20
0AFGxK180Sxx	180A		1600	12000	29000	21

Consult manufacturer for other ratings
 -Typical Pre-arcing I²t are measured at 10In Current
 -Power loss provided at rated current

Conditions for operation in service

Where the following conditions apply, fuses complying with this standard are deemed capable of operating satisfactorily without further qualification.
Normal temperature: -5℃ to 40℃;
The altitude of the site of installation of the fuses does not exceed 2000m above sea level;
The air is clean and the relative humidity does not exceed 50 % at the maximum temperature of 40℃;
Higher relative humidities are permitted at lower temperatures, e.g. 90 % at 20℃;
Under these conditions, moderate condensation may occasionally occur due to variation in temperature.
For operation conditions other than above, please contact manufacturer.
