

KÄUDEN™

Item Code – XT486

RJ45 Dual Plug Type Crimping Tool for standard RJ45 and extended earth clip types

Images above from top- CAT6A ,CAT5e and CAT6 plug

- Use with standard CAT5e, CAT6 Plugs and CAT6A , CAT7 RJ45 plug with extended earth clip
- Special crimping function for extended metal plug grounding clip/tail
- Switch between plug types by adjusting screw.
- Release lock button
- Also crimps Rj11/12 plugs

To change from one plug type to another just loosen the screw with small posidrive screwdriver (labelled CAT5e and CAT7 for convenience) and move the position from one to another. For CAT6A and CAT7 plugs the cable clamp pin is disabled and for normal Cat5e/CAT6 plugs it is enabled , that being the basic difference. The ground crimp function will neatly clamp the extended earth clip/tails around the cable for a nice professional finish
