

## End Cap with 2 DB9F, Solder Type

Item # DIYM9F2

### Description

A fully shielded metal case plus a variety of end caps allow the user to create and build a variety of data line adapters. End cap options include DB9, DB25, DB37 female plus blank and 0.5" hole versions. 3" x 3" x 1" size allows ample room for a PC board and small components. Durable construction featuring heavy gauge steel and nickel plated end caps. Color is beige, (8) assembly screws provided.

### Features

- Gold plated contacts provide reliable connections with repeated mating cycles
- Heavy gauge steel construction for long life
- Dual DB9 female end cap for user defined adapters
- End caps utilize solder cup D-Sub connectors for easy termination of wire or components

### Application

- Data networking
- Custom OEM applications

- RS-232
- RS-485
