

19" Low Profile Sliding Shelf 14" Surface Area

Item # SSL

Description

Rugged design and heavy gauge steel construction is what makes Middle Atlantic rack equipment the best choice for any installation. This low profile sliding shelf features nylon roller slides with positive-stop lockouts. This shelf only requires one rack space for installation and will extend 10-inches for storing equipment. Telescopic rear supports extend out to attach to the rear rack rail in and rack. Choose Middle Atlantic's sliding rack shelf for your next project.

Features

- Nylon roller slides with positive-stop lockouts provide smooth operation
- Only 1U! saves valuable rack space
- Extends up to 10" providing easy access to equipment
- Heavy gauge steel construction ensures durability
- Used to house communications equipment in a 19" rack

Application

- Data Centers
- MDF/IDF installations
- Network Infrastructure
- LAN aggregation
