# Signal Transducer

#### **Features**

- · Input / Output configuration selected via DIP switch combinations
- · Choice of multiple analog input-output configurations
- Provides 3-way galvanic isolation of 3.75kV
- Fast output Response Time (<100ms)</li>
- · Sleek 22.5mm wide

## RoHS Compliant

### **Specification**

| Part Number                   | MP008417                                                                    | MP008418                                                  | MP008419                                       |  |  |  |
|-------------------------------|-----------------------------------------------------------------------------|-----------------------------------------------------------|------------------------------------------------|--|--|--|
| Parameters                    |                                                                             |                                                           |                                                |  |  |  |
| Supply Voltage                | 24V AC                                                                      |                                                           |                                                |  |  |  |
| Supply Variation              | -15% to +15%                                                                |                                                           |                                                |  |  |  |
| Power Consumption             | 4 VA Max.                                                                   |                                                           |                                                |  |  |  |
| Device Characteristics        |                                                                             |                                                           |                                                |  |  |  |
