

PCN-OPT-1219-2022 - Update of Time Schedule Vishay Part Numbers: *-GS15

22. February 2023

Postponement of PCN-OPT-1219-2022

Dear Valued Customer:

In July 2022 the Opto group of Vishay Semiconductor published a PCN announcing the change in the number of parts per reel of the LEDs in the table below. The number of parts per reel was changing from 3000 pieces (-GS08) to 5000 pieces (-GS15). The effective date was 21-Oct-2022. This change has been delayed to the end of April 2023.

Old Part Name	New Part Name
TLMG1100-GS08	TLMG1100-GS15
TLMO1000-GS08	TLMO1000-GS15
TLMO1100-GS08	TLMO1100-GS15
TLMP1100-GS08	TLMP1100-GS15
TLMS1000-GS08	TLMS1000-GS15
TLMS1100-GS08	TLMS1100-GS15
TLMS1101-GS08	TLMS1101-GS15
TLMY1000-GS08	TLMY1000-GS15
TLMY1100-GS08	TLMY1100-GS15
VLMY10J2K2-4-GS08	VLMY10J2K2-4-GS15

What we will do:

- Existing orders of -GS15 with confirmed ship dates before April 30th may be changed to -GS08 in a timely manner in case of high urgency.
- New orders of -GS15 with request dates before April 30th that, given the lead-time, will ship before April 30th may be changed to -GS08 in a timely manner in case of high urgency.
- Existing orders of -GS08 with confirmed ship dates after April 30th will be changed to -GS15.
- New orders of -GS08 with request dates after April 30th will be changed to -GS15.

What you should consider:

- Because the packaging and reel labels will show the -GS08 suffix, there may be a mismatch of open order part numbers at your receiving warehouse.
- New orders should be exclusively -GS15 from March-15 onwards or earlier if the realistic request date is after April 30th.

We apologize for this delay and the resulting confusion.

Regretfully,

Opto Team
