

# PowerCat Modules Unloaded:

## Mod-Snap III, Euromod II, Contura, DIN, 22.5 x 45mm and 45 x 45mm

### Modules without DataGate Jacks fitted

Top row, from left: MOD-Snap III module, Euromod II module, Contura module,  
Bottom row, from left: DIN module, 22.5 x 45mm module, 45 x 45mm module

### Modules with DataGate Jacks fitted

Top row, from left: MOD-Snap III module, Euromod II module, Contura module,  
Bottom row, from left: DIN module, 22.5 x 45mm module, 45 x 45mm module

## Molex PowerCat unloaded modules are compatible with all Molex's unique shuttered DataGate Jacks.

PowerCat Modules are specifically designed for compatibility with many European wall outlet styles. The angled design reduces the patch cord bend radius to prevent degradation of transmission performance in the work area outlet.

The products are supplied unloaded (no jacks supplied), allowing installation flexibility. C5e and C6 UTP or C6A Shielded DataGate Jacks can be fitted as required. Manufactured of high-quality scratch resistant thermoplastic the unloaded modules are supplied with a transparent label cover and paper label for protected port identification.

Loaded (inclusive of jack) versions of these modules are also available for customers preferring to purchase the module and jack under one part number. (Contact Customer Services for part numbers)
