

230107 - STATIC SHIELD BAG 2300R SERIES CUSHIONED, 10x7, 50EA

Not sure what bag or film fits your application? Take the packaging quiz [here](#).

Metallized Shielding Bag with Closed Cell Air-Cushion Protection Layers

Lightweight ESD protective packaging with heavy-duty protection absorbs impact and prevents product damage.

>20lb Puncture Strength Average

High puncture resistance provides physical protection for contents.

<20 nJ Energy Limit Test per ANSI/ESD STM11.31

Meets ANSI/ESD S20.20 and ANSI/ESD S541 requirements for ESD shielding packaging inside and outside an ESD Protected Area (EPA).

Rs 1×10^4 to $<1 \times 10^{11}$ ohms per ANSI/ESD STM11.11, Packaging ANSI/ESD S541 and Static Control Bag ANSI/ESD S11.4 Level 3 (except transparency)

Allows bag to be used throughout an ESD Protected Area and grounded when placed on a grounded surface or handled by a grounded operator.

Save Packing Time and Labor

No need to cut and tape loose bubble wrap or additional packaging layers to protect product.
