

**EasyPACK™ module with TRENCHSTOP™ IGBT H3 and emitter controlled 7 diode and PressFIT / NTC**

## Features

- Electrical features
    - $V_{CES} = 1200 \text{ V}$
    - $I_{C\text{ nom}} = 225 \text{ A} / I_{CRM} = 450 \text{ A}$
    - Low switching losses
    - High-speed IGBT H3
  - Mechanical features
    - Compact design
    - PressFIT contact technology
    - Integrated NTC temperature sensor
    - High power density

### Typical appearance

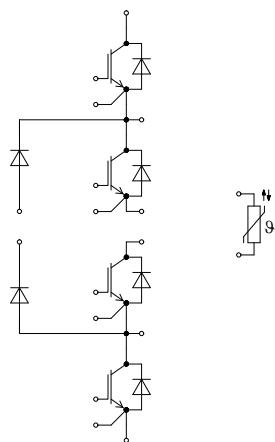

### Potential applications

- Energy storage systems
  - Solar applications
  - Three-level applications

## Product validation

- Qualified for industrial applications according to the relevant tests of IEC 60747, 60749 and 60068

## 1 Package

**Table 1 Insulation coordination**

| Parameter                           | Symbol     | Note or test condition                         | Values                  | Unit |
|-------------------------------------|------------|--|-------------------------|------|
| Isolation test voltage              | $V_{ISOL}$ | RMS, $f = 50 \text{ Hz}$ , $t = 1 \text{ min}$ | 3.2                     | kV   |
| Internal isolation                  |            | basic insulation (class 1, IEC 61140)          | $\text{Al}_2\text{O}_3$ |      |
| Comparative tracking index          | $CTI$      |  | > 400                   |      |
| Relative thermal index (electrical) | $RTI$      | housing  | 140                     | °C   |

**Table 2 Characteristic values**

| Parameter                                | Symbol        | Note or test condition                         | Values    |      |      | Unit |
|--|---------------|--|-----------|------|------|------|
|  |               |  | Min.      | Typ. | Max. |      |
| Stray inductance module                  | $L_{sCE}$     |  |           | 21   |      | nH   |
| Module lead resistance, terminals - chip | $R_{AA'+CC'}$ | $T_H = 25 \text{ °C}$ , per switch             |           | 2.3  |      | mΩ   |
| Module lead resistance, terminals - chip | $R_{CC'+EE'}$ | $T_H = 25 \text{ °C}$ , per switch             |           | 1.7  |      | mΩ   |
| Storage temperature                      | $T_{stg}$     |  | -40       |      | 125  | °C   |
| Mounting torque for module mounting      | $M$           | - Mounting according to valid application note | M5, Screw | 1.3  | 1.5  | Nm   |
| Weight                                   | $G$           |  |           | 78   |      | g    |

Note: The current under continuous operation is limited to 25A rms per connector pin.

## 2 IGBT, T1 / T4

**Table 3 Maximum rated values**

| Parameter                         | Symbol    | Note or test condition               | Values | Unit |
|-----------------------------------|-----------|--------------------------------------|--------|------|
| Collector-emitter voltage         | $V_{CES}$ | $T_{vj} = 25 \text{ °C}$             | 1200   | V    |
| Implemented collector current     | $I_{CN}$  |                                      | 225    | A    |
| Continuous DC collector current   | $I_{CDC}$ | $T_{vj \max} = 175 \text{ °C}$       | 175    | A    |
| Repetitive peak collector current | $I_{CRM}$ | $t_p$ limited by $T_{vj \text{ op}}$ | 450    | A    |
| Gate-emitter peak voltage         | $V_{GES}$ |                                      | ±20    | V    |

**Table 4 Characteristic values**

| <b>Parameter</b>                     | <b>Symbol</b>       | <b>Note or test condition</b>   | <b>Values</b>   |             |             | <b>Unit</b> |
|--------------------------------------|---------------------|---|---|-------------|-------------|-------------|
|                                      |                     |   | <b>Min.</b>   | <b>Typ.</b> | <b>Max.</b> |             |
| Collector-emitter saturation voltage | $V_{CE\text{ sat}}$ | $I_C = 225 \text{ A}, V_{GE} = 15 \text{ V}$  | $T_{vj} = 25^\circ\text{C}$                           |             | 2.07        | 2.55        |
|                                      |                     |   | $T_{vj} = 125^\circ\text{C}$                          |             | 2.50        |             |
|                                      |                     |   | $T_{vj} = 150^\circ\text{C}$                          |             | 2.60        |             |
| Gate threshold voltage               | $V_{GE\text{th}}$   | $I_C = 7.8 \text{ mA}, V_{CE} = V_{GE}, T_{vj} = 25^\circ\text{C}$  |   | 5.25        | 5.80        | 6.35        |
| Gate charge                          | $Q_G$               | $V_{GE} = \pm 15 \text{ V}$   |   |             | 1.73        |             |
| Internal gate resistor               | $R_{G\text{int}}$   | $T_{vj} = 25^\circ\text{C}$   |   |             | 3.3         |             |

## **Important notice**

The information given in this document shall in no event be regarded as a guarantee of conditions or characteristics ("Beschaffenheitsgarantie").

With respect to any examples, hints or any typical values stated herein and/or any information regarding the application of the product, Infineon Technologies hereby disclaims any and all warranties and liabilities of any kind, including without limitation warranties of non-infringement of intellectual property rights of any third party.

In addition, any information given in this document is subject to customer's compliance with its obligations stated in this document and any applicable legal requirements, norms and standards concerning customer's products and any use of the product of Infineon Technologies in customer's applications.

The data contained in this document is exclusively intended for technically trained staff. It is the responsibility of customer's technical departments to evaluate the suitability of the product for the intended application and the completeness of the product information given in this document with respect to such application.

## **Warnings**

Due to technical requirements products may contain dangerous substances. For information on the types in question please contact your nearest Infineon Technologies office.

Except as otherwise explicitly approved by Infineon Technologies in a written document signed by authorized representatives of Infineon Technologies, Infineon Technologies' products may not be used in any applications where a failure of the product or any consequences of the use thereof can reasonably be expected to result in personal injury.
