

A 105x100mm i.MX8M Mini SBC with 3 Mini-PCIe Slots, Two GbE Ethernet, PoE, Wifi/BLE and MIPI-CSI & MIPI-DSI

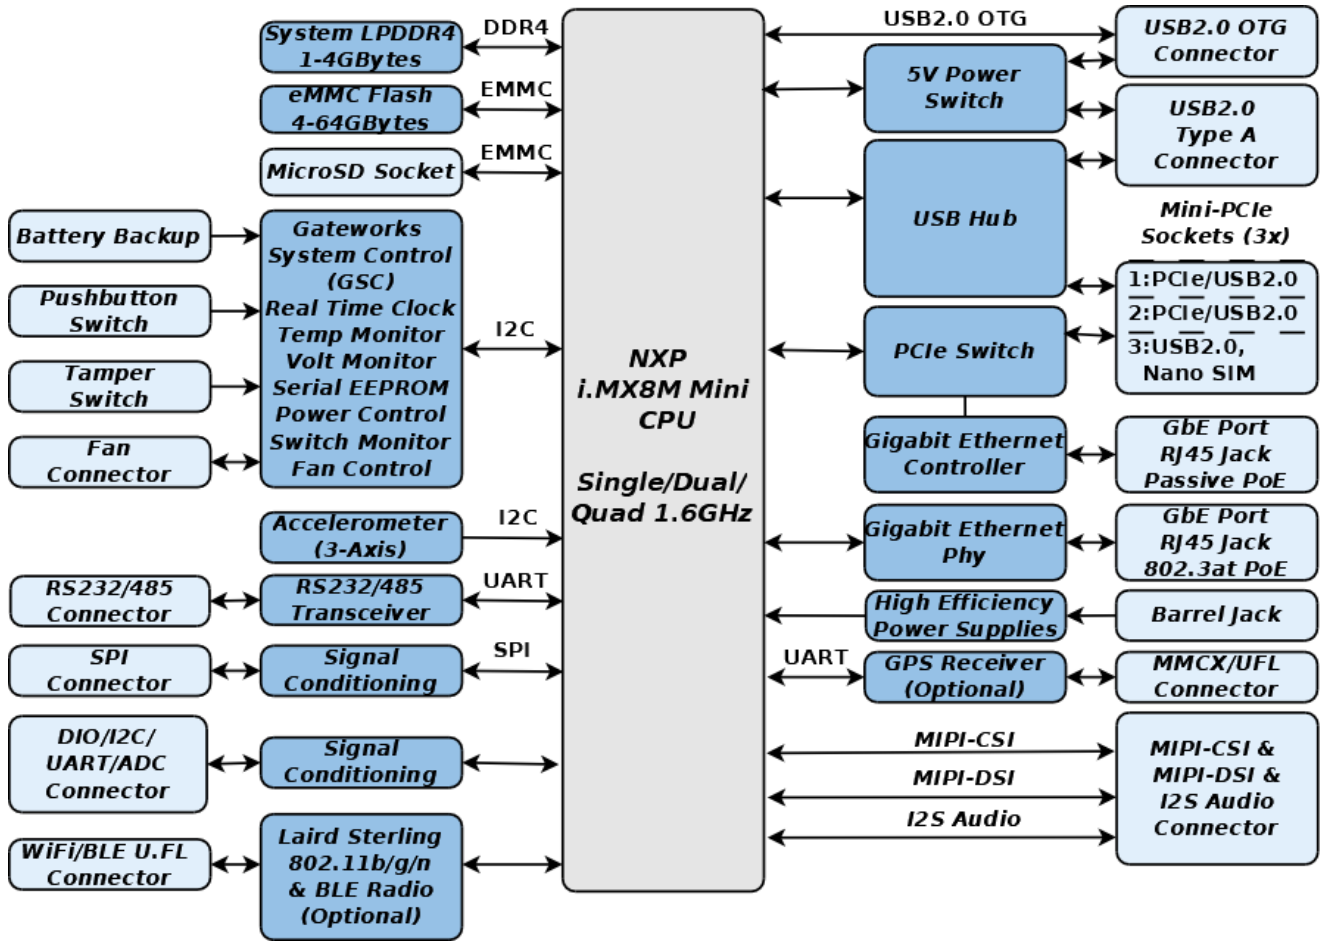

The GW7300-00 is a member of the Gateworks 7th generation Venice family of single board computers targeted for rugged and industrial embedded applications. The GW7300-00 features the 64-bit NXP™ i.MX8M Mini Quad Core ARM® Cortex™-A53 SoC processor operating at 1.6GHz, 1GBytes of LPDDR4 DRAM, and 8GBytes of eMMC System Flash. Two Mini-PCIe expansion sockets can be used for PCI Express peripherals such as 802.11ax/ac/b/g/n WiFi radios and 5G/4G/3G/CATM1 cellular modems. A third Mini-PCIe socket supports only USB for modems. Peripheral headers support Digital I/O, Analog Input, RS232/RS485/TTL Serial, I2C and SPI. A combined MIPI-DSI/CSI header with I2S audio offers video input/output. A MicroSD & Nano SIM slot are standard. A 3-Axis accelerometer is standard. An optional GPS and onboard Laird Sterling 802.11b/g/n/ac WiFi/Bluetooth module are available. The Gateworks System Controller provides embedded features such as real time clock, voltage and temperature monitor, programmable pushbutton, and programmable board shut-down and wake-up for remote applications. A wide-range DC input power supply provides up to 15W of power. Power is applied through a dedicated barrel jack or an Ethernet port in an active 802.3af/at or passive Power over Ethernet (PoE) architecture. Ubuntu Linux BSP is supported.
