Features

1. The chip ferrite beads BLM series is designed to function nearly as a resistor at noise frequencies, which greatly reduces the possibility of resonance and leaves signal wave forms undistorted. BLM series is effective in circuits without stable ground lines because BLM series does not need a connection to ground. 2. The nickel barrier structure of the external

electrodes provides excellent solder heat resistance. 3.BLM15PX series can be used in high current circuits due to its low DC resistance. It can match power lines to a maximum of 3ADC.
