The TEL 6WI is an isolated 6 Watt converters series which comes in an ultra compact DIP-16 metal package. It solidifies the new package standard in this power range with a power density of 1,6 W/cm3 which almost doubles the power density compared to 6 Watt converters in DIP-24 packages. The TEL 6WI offers a wide 4:1 input voltage range and featured a high efficiency of up to 87% which enables an operation temperature of up to +70°C at full load and up to 85°C with 60% load. With only a single input capacitor (SMD) the converters comply with conducted and radiated emission standard EN 55032 class A. Overall they feature an economical solution for space critical and cost sensitive applications in instrumentation, IT and industrial electronics.
