Removing a staggered jumper:

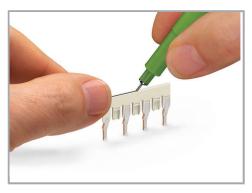

Insert the operating tool between the staggered jumpers, then lift up the jumper.

Commoning

Staggered jumper (seven contacts)

Breaking off contact lugs. Individual jumper contacts can be broken off by bending them. The remaining piece of insulation will meet requirements for clearances and creepage distances.

Staggered jumpers

Marking with a felt-tip pen.

Staggering jumpers in a single jumper slot:

Custom staggered jumpers can be created, e. g., for bridging over a terminal block with a different potential. Make sure that only one contact lug is in contact with the terminal block.

The contact lugs of the customized staggered jumpers contact the terminal blocks via the gaps created in the second jumper. Insert and press the ready-made jumper assembly into the jumper slot until it hits the backstop.
