

## DF19 Series

# 1.0mm Pitch, Low Profile Wire-to-Board, FPC-to-Board, Micro-coaxial Cable-to-Board Connectors

Low Profile

Thin coaxial

FPC

# Features

## 1. De Facto Standard for LCD Panel Connection

DF19 has been accepted as the market standard for LCD panels (12in. or less) due to its high performance for LVD high speed differential signals.

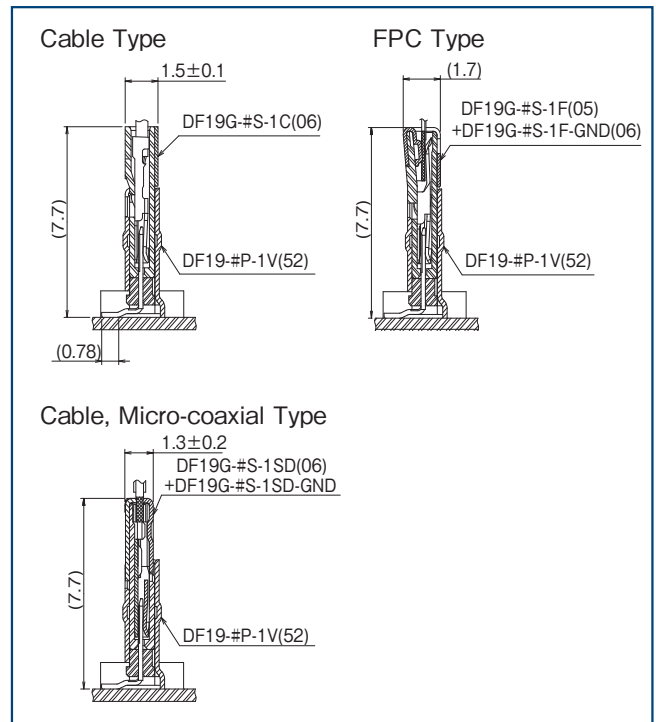

## 2. Low Profile Design

Cable, micro-coaxial type : 1.5mm thickness (1.6mm Max.)  
 FPC Type : 1.7mm Max.

## 3. Common Header

Header is compatible with the 3 socket types (discrete wire, FPC and micro-coaxial types), for a wide selection of mating combinations.

## 4. Uniform External Dimensions

External dimensions of each socket type are the same and can be used in a wide array of applications.

## 5. Wide Varieties

Header is available in top-board, offset, reverse mount offset and vertical mounted styles to meet a wide array of application needs.

## 6. Ground Connection with Outer Shell

Metal shell enables ground connection.

## 7. Glow Wire Compatible (IEC60695-2-11 Standard)

### Applications

Mobile phones, LCD connections, DVC, DSC, PDA, camera modules, and other small equipment

## Product Specifications

Rated Current	28 AWG	30 AWG	32 AWG	36 AWG	FPC	Micro-coaxial Cable 40 AWG	Operating Temperature (Note 1)	-35 to +85°C
	1A/pin	0.9A/pin	0.8A/pin	0.5A/pin	0.5A/pin	0.3A/pin	Operating Humidity Range (Note 2)	40 to 80%
Rated Voltage	100V AC/DC						Storage Temperature Range (Note 3)	-10 to +60°C
							Storage Humidity Range (Note 3)	40 to 70%

Note 1 : Includes temperature rise due to current flow.

Note 2 : Please use without condensation.

Note 3 : Applicable to unused items in packaged state.

Note 4 : Information contained in this catalog represents general requirements for this Series. Contact us for the drawings and specifications for a specific part number shown.

Item	Specification	Conditions
Insulation Resistance	500M $\Omega$ Min.	100V DC
Withstanding Voltage	No flashover or insulation breakdown.	300V AC for 1 min.
Contact Resistance	30m $\Omega$ Max. (50m $\Omega$ Max. for FPC)	1mA
Vibration	No electrical discontinuity of 1 $\mu$ s or more.	Frequency : 10 to 55 Hz, single amplitude of 0.75mm, in 3 direction for 10 cycles
Humidity (Steady State)	Contact Resistance : 30m $\Omega$ Max. (50m $\Omega$ Max. for FPC) Insulation Resistance : 500M $\Omega$ Min.	96 hours at temperature of 40 $\pm$ 2°C and humidity of 90 to 95%
Temperature Cycle	Contact Resistance : 30m $\Omega$ Max. (50m $\Omega$ Max. for FPC) Insulation Resistance : 500M $\Omega$ Min.	Temperature : -55°C $\rightarrow$ +5 to +35°C $\rightarrow$ +85°C $\rightarrow$ +5 to +35°C Time (Minutes) : 30 $\rightarrow$ 10 $\rightarrow$ 30 $\rightarrow$ 10 for 5 cycles
Mating Durability	Contact Resistance : 30m $\Omega$ Max. (50m $\Omega$ Max. for FPC)	30 cycles
Soldering Heat Resistance	No deformation of the insulator parts affecting performance.	Re-flow soldering : At the recommended temperature profile Manual soldering : Soldering iron temperature 350°C , 5 seconds

## Crimping Precautions

### ■ Items Required Prior to Crimping

The work-related documents shown below are required before starting harness assembly.  
(The ● mark represents required documents.)

Please contact your Hirose sales representative if you do not have these documents.

Document Title	Description	Automatic Crimping Machine	Hand Crimping Tool	Remarks
① Crimping Machine Main Unit Instruction Manual	Explanation of main press unit	●	-	Bundled with purchase of main press machine unit.
② Applicator Instruction Manual	Crimp Method	●	-	Bundled with purchase of applicator.
③ Applicator Spare Parts List	Applicator Installation Instruction	●	-	
④ Crimp Conditions	Crimp height, tensile strength standard value	●	-	
⑤ Crimp Quality Standards	Various standards for crimping conditions	●	-	
⑥ Hand Tool Operating Instructions	Crimp method, crimp height and tensile height standard value	-	●	Bundled with purchase of hand tool.
⑦ Cable Assembly	Cable assembly	●	●	Contact a Hirose sales representative.

### ■ Tools

- Use tools designated by Hirose when crimping.
- Crimping performed using tools other than those specified is outside the scope of warranty.
- The operating instructions are available for the crimping machine and the applicator. Be sure to carefully read the operating instructions manual before beginning work.

### ■ Applicable Cables

Check that the cables to be used are within the applicable range.

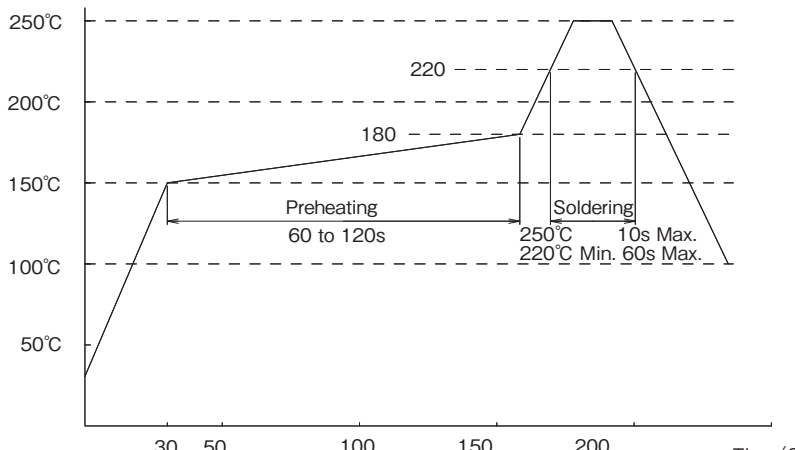

If you intend to use a cable other than those recommended, contact a sales representative.

#### [Precautions]

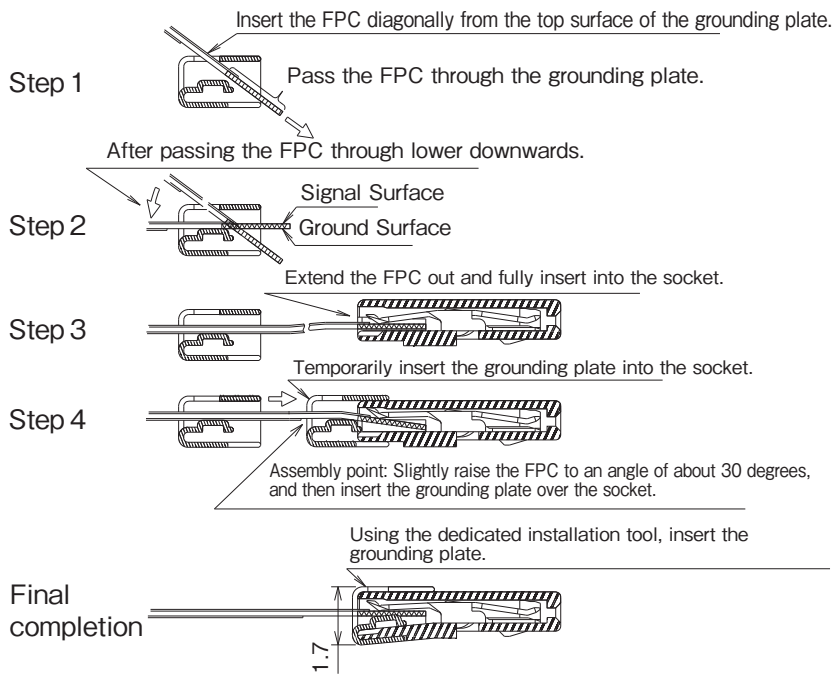

- Cables applicable to crimping connectors are tin-plated stranded soft-copper wire.
- Avoid crimping solid wire, wires with polyester threads or tin coated wires.
- Avoid crimping two cables together.
- The crimp height setting values (Note) may vary between tin-plated and gold-plated terminals even if the same electric wires are used.
- The crimp height setting values (Note) may vary depending on the difference in the core wire configuration even if the computed cross-sectional area is the same.

Note : The crimp height is an important item that determines crimping quality. We execute crimping tests for each electric wire to ensure the optimal value for the crimp height with high precision, thereby ensuring optimal setup values.

## Precautions

1. Recommended Temperature Profile	<p>Temperature (°C)</p>  <p>Note 1 : Up to 2 cycles of reflow soldering are possible under the same conditions, provided that there is a return to normal temperature between the first and second cycle.</p> <p>Note 2 : The temperature profile indicates the temperature of the surface of the connector lead.</p> <p>Note 3 : The color of the grounding plate may change color, although this does not affect the product performance.</p>
2. Recommended Manual Soldering Conditions	Manual soldering : 350±10°C for 5 seconds
3. Recommended Metal Mask Thickness	0.15mm
4. Board Warpage	Maximum of 0.03mm at the connector center, with both ends of the connector as reference points.
5. Cleaning Conditions	Refer to "Wire-to-Board Connector Use Handbook."
6. Termination Conditions	Refer to "Wire-to-Board Connector Use Handbook."
7. Cautions	<ul style="list-style-type: none"> <li>■ Excessive prying during mating and unmating may result in damage.</li> </ul>
8. Handling	<p>Please refer to the following documents when handling the product.</p> <ul style="list-style-type: none"> <li>■ Crimp Quality Standard (ETAD-H9045-00)</li> <li>■ Wire-to-Board Connector Use Handbook</li> <li>■ Cable Assembly Procedure (ETAD-H0963-00)</li> </ul>

## Single Row Socket (FPC Type) Assembly Method

Note 1 : The grounding plate and the socket are supplied as separate components.

Note 2 : Dedicated assembly tools are required for assembly.

Note 3 : When temporarily inserting the ground plate, the FPC can be easily inserted by lightly lifting the FPC up to 30° and designing a self-alignment guide.

However, if excessive force (bending, twisting, etc.) is applied to the FPC, the FPC (edge of the cover film) copper foil may crack.

Note 4 : If the ground plate cannot be inserted, make sure it is aligned parallel to the socket and do not force it in.

Note 5 : To protect the FPC, insert and remove the connector parallel to the mating surface.

Note 6 : To protect the FPC, do not apply excessive tension.

Note 7 : Refer to the FPC manufacture recommended bending radius and other specifications. Distance should be allowed for bending as shown below.

Note 8 : When terminating the FPC there is a risk of misuse of the tools, or injury from the ridge on the metal part of the connector, etc. Follow the terminal tools instruction manual to ensure proper termination.

## While Taking into Consideration

Specifications mentioned in this catalog are reference values.

When considering to order or use this product, please confirm the Drawing and Product Specifications sheets.

Use an appropriate cable when using the connector in combination with cables.

If considering usage of a non-specified cable, please contact your sales representative.

If assembly process is done by jigs & tools which are not identified by Hirose, assurance will not be given.

If considering usage for below mentioned applications, please contact your sales representative.

In cases where the application will demand a high level of reliability, such as automotive, medical instruments, public infrastructure, aerospace/ defense etc. Hirose must review before assurance of reliability can be given.
